NOTE ON THE GENERIC NAME SAFOLE, REPLACING BOULENGERINA, FOR A GENUS OF KUHLIID FISHES.

By DAVID STARR JORDAN,
Of Stanford University, California.

In our recent paper on the Sparoid fishes of Japan¹ Jordan and Thompson have adopted the generic name *Boulengerina* Fowler² for the genus which contains the marine *Kuhliidæ*. Dr. Leonhard Stejneger calls my attention to the fact that the name *Boulengerina* was applied by Dr. Louis Dollo³ to a genus of snakes. The genus of fishes is thus left without a name. It may be called *Safole*. This is the vernacular name in Samoa of *Safole tæniura*, which species (*Dules tæniurus* Cuvier and Valenciennes) may be taken as the type of the genus.

Safole, in Samoan, corresponds to the Hawaiian name Ahole-hole, applied to *Safole sandvicensis*.
