I.—THE SUBJECT MATTER OF THE PRESENT “DIRECTION”

The present Direction contains Rulings given by the International Commission on Zoological Nomenclature on the family-group-name implications of all the cases involved in the Opinions included in Volume 12 of the Opinions and Declarations rendered by the International Commission on Zoological Nomenclature, other than those cases where those implications were dealt with in the Opinions concerned, or have since been dealt with in an earlier Direction (Direction 53) included in that volume. The proposals on which the decisions given in the present Direction were based, which were drawn up in consultation with specialists in the groups concerned, were submitted to the Commission by
the Secretary on 16th May 1956. The paper so submitted was as follows:

**Proposed addition to the "Official List of Family-Group Names in Zoology" or, as the case may be to the "Official Index of Rejected and Invalid Family-Group Names in Zoology" of family-group names involved in the cases dealt with in Volume 12 of the "Opinions and Declarations" Series ("Opinions" 380—400)**

By FRANCIS HEMMING, C.M.G., C.B.E.

*(Secretary to the International Commission on Zoological Nomenclature)*

The purpose of the present paper is to lay before the International Commission on Zoological Nomenclature the family-group-name problems involved in the cases dealt with in *Opinions* 380 to 400 which collectively will form volume 12 of the *Opinions and Declarations* Series and to seek decisions from the Commission in those cases where, under the General Directive issued to the Commission by the International Congress of Zoology, names required to be placed on the **Official List of Family-Group Names in Zoology** or on the **Official Index of Rejected and Invalid Family-Group Names in Zoology**.

2. Of the *Opinions* covered by the present paper ten have so far been published and the remaining eleven are now in the press and would have been published before now, had it not been for the delays resulting from the recent strike in the London printing trade. Of the ten *Opinions* already published the first four (*Opinions* 380—382) appeared in January 1956 and copies are already in the hands of members of the Commission; the remaining six (*Opinions* 384—389) were published on 20th April 1956 and copies are in transit to Commissioners. In order to facilitate the consideration of the proposals now submitted in connection with these six *Opinions* and also those connected with the eleven *Opinions* now in the press, particulars are given in the present paper both of the place of publication in the *Bulletin of Zoological Nomenclature* of the application concerned and the number of the Voting Paper issued in connection with it.

3. As on previous similar occasions consultations have been held in each case with specialists in the group concerned and the Commission is much indebted to these specialists for the assistance which they have given in supplying the necessary information and in co-operating in the preparation of the proposals now submitted. The names of the specialists who have assisted in this matter are given in the following list, together with an indication of the cases on which each has given advice:

J. Wyatt Durham *(University of California, Department of Paleontology, Berkeley, California, U.S.A.):* Mellita Agassiz (*Opinion* 393);

---

1 The eleven *Opinions* here referred to have since been published. *Opinions* 390—393 were published on 19th June 1956 and *Opinions* 394—400 were published on 16th July of the same year.
L. Forcart (Museum of Natural History, Basle, Switzerland): Pyramidella Lamarck (Opinion 386);
Francis Hemming (London): Heliconius Kluk (Opinion 382); Melanargia Meigen (Opinion 400);
L. B. Holthuis (Rijksmuseum van Natuurlijke Historie, Leiden, The Netherlands): Sicyonia Milne Edwards (H.) (Opinion 382); Hymenocera Latreille and Conchodytes Peters (Opinion 383);
G. H. E. Hopkins (British Museum (Natural History). The Zoological Museum, Tring, Herts, England): Chaetopsylla Kohaut, Malariaeus Jordan, and Amalarcaeus Ioff (Opinion 388);
F. C. Hottes (Grand Junction, Colorado, U.S.A.): Hyalopterus Koch (Opinion 397); Lachnus Burmeister & Cinara Curtis (Opinion 399);

A. K. Miller (State University of Iowa, Iowa City, Iowa, U.S.A.): Muensteroceras Hyatt (Opinion 391); Sandbergeroceras Hyatt (Opinion 392);

4. The family-group-name position involved in each of the Opinions concerned is examined in turn in the Annexe to the present paper. Proposals are submitted in the Annexe in each case where action is called for under the General Directive referred to in paragraph 1 above but has not yet been taken.

ANNEXE

Survey of the family-group-name problems involved in the "Opinions" included in volume 12 of the "Opinions and Declarations" Series ("Opinions" 380—400) with proposals for action in compliance with the General Directive relating to the placing of family-group names on the "Official List" and "Official Index" of names of that category, where such has not already been taken

OPINION 380 (Houttuyn's Animalium Musaei Houttuiniani Index)
No family-group-name problems arise in connection with this Opinion.

OPINION 381 (Suppression of two old and forgotten specific names in order to render the name hispidus Olivier, 1811, as published in the combination Palaemon hispidus the oldest available name for the species concerned)
This Opinion is concerned only with specific-name problems.
OPINION 382 (Sicyonia Milne Edwards (H.), 1830 (Class Crustacea, Order Decapoda) and Heliconius Kluk, 1802 (Class Insecta, Order Lepidoptera))

(1) Action called for in respect of the Crustacea Section of this Opinion is as follows:—

(a) To be placed on the Official List:—

SICYONINAE (correction of SICYONINAE) Ortmann, 1898, in Bronn, Klass. Ordn. Thierr. 5 (2) : 1121 (type genus: Sicyonia Milne Edwards (H.), 1830)

(b) To be placed on the Official Index:—

(i) SICYONINAE Ortmann, 1898 [reference as in (a) above] (an Invalid Original Spelling for SICYONINAE)

(ii) EUSICYONINAE Burkenroad, 1934, Bull. amer. Mus. nat. Hist. 68 : 116 (type genus: Eusicyonia Stebbing, 1914) (a junior objective synonym of SICYONINAE Ortmann, 1898, the respective type genera having the same nominal species as type species)

(2) Action called for in respect of the Lepidoptera Section of this Opinion is as follows:—

(a) To be placed on the Official List:—

HELICONIIDAE (correction of HELICONIIDAE) Swainson, 1827, Phil. Mag. (n.s.) 1 : 187 (type genus: Heliconius Kluk, 1802)

(b) To be placed on the Official Index:—

HELICONIIDAE Swainson, 1827 [reference as in (a) above] (an Invalid Original Spelling for HELICONIIDAE)

OPINION 383 (Hymenocera Latreille, 1819)

No family-group-name problem arises in this case.

OPINION 384 (addition of the names of fifty-two genera of Carnivora to the Official List of Generic Names in Zoology)

A considerable number of family-group-name problems arise in this case. Proposals in regard to this matter are being submitted separately with Voting Paper V.P.(O.M.)(56)9.

OPINION 385 (specific names for the Common Garter Snake of the Eastern United States and for the Eastern Ribbon Snake of North America)

This Opinion is concerned only with specific-name problems.

OPINION 386 (Pyramidella Lamarck, 1799)

A family-group name based upon the generic name Pyramidella Lamarck was published independently in 1840 by two authors, namely (i) PYRAMIDELLIDAE Gray (J.E.), 1840, Syn. Contents Brit. Mus. (ed. 42): 148, and (ii) PYRAMIDELLIDAE d’Orbigny, [1840], Voy. Amer. Merid. 5 (3): 396. Gray’s publication of this name is superior to that by d’Orbigny because he gave a proper diagnosis which d’Orbigny did not. Moreover, Gray’s book, which is easily accessible, is known beyond question to have been published in 1840, while the date for the relevant portion of d’Orbigny’s much scarcer book is an attributed date and the possibility that it was not actually published until 1841 cannot be altogether excluded. For these reasons the consultants recommend that this name be accepted as having been first published by Gray.

As regards the family-group name PLOTIIDAE based upon the generic name Plotia Röding, 1798, it should be noted that, as this generic name has been suppressed under the Plenary Powers, the family-group name based upon it has ipso facto been automatically suppressed also under the provisions of Declaration 20 (1955, Ops. Decls. int. Comm. zool. Nomencl. 10 (19): i—viii). In the present case there is also a different and prior reason why the name PLOTIIDAE as published by Forcart in 1951 is not acceptable as a name. Forcart in the paper in question was advocating the suppression of the name Plotia Röding in favour of Pyramidella Lamarck and in doing so observed—by way of showing the absurdity of accepting the name Plotia—that, if this course were to be adopted, it would be necessary to change the family name from PYRAMIDELLIDAE to PLOTIIDAE. The latter name, so published, was clearly not published with a view to its being used in zoological nomenclature (1953, Copenhagen Decisions zool. Nomencl. : 63, Decision 114).

Action called for:—

(a) To be placed on the Official List:

PYRAMIDELLIDAE Gray (J.E.), 1843 [reference as above] (type genus: Pyramidella Lamarck, 1779)

(b) To be placed on the Official Index:

PLOTIIDAE Forcart (L.), 1951, Berichtig. Arch. Moll. 80 (1/3): 86 (type genus: Plotia Röding, 1798) (invalid (i) because published for a purpose other than for use in Zoological nomenclature and (ii) under Declaration 20 because the name of type genus has been suppressed under the Plenary Powers).
OPINION 387 (Dasypeltis Wagler, 1830)

Name required to be placed on the *Official List*:

The name *Anodon* Smith, 1829, also dealt with in this *Opinion*, has not been taken as the base for a family-group name.

OPINION 388 (suppression of Trichopsylla Kolenati, 1863)

No family-group-name problem arises in connection either (a) with the name *Trichopsylla* Kolenati, 1863, suppressed under the Plenary Powers in this *Opinion* or (b) with any of the following names, each of which was placed on the *Official List of Generic Names in Zoology* in this *Opinion*: *Chaetopsylla* Kohaut, 1903; *Malaraeus* Jordan, 1933; *Amalaraeus* Ioff, 1936.

OPINION 389 (two long-overlooked specific names for fleas)

This *Opinion* is concerned exclusively with the status of certain specific names.

OPINION 390 (specific name *simus* Linnaeus, 1767, as published in the combination *Coluber simus*)

This *Opinion* is concerned exclusively with the interpretation of a specific name.

OPINION 391 (*Muensteroceras* Hyatt, 1884)

The generic name *Muensteroceras* Hyatt, 1884, has not been taken as the base for a family-group name.

OPINION 392 (*Sandbergeroceras* Hyatt, 1884)

Name required to be placed on the Official List:

OPINION 393 (Mellita Agassiz, 1841)
Name required to be placed on the Official List:
MELLITINA Stcfanini, 1911, Boll. Soc. geol. ital. 30 : 749 (type genus: Mellita Agassiz (J.L.R.), 1841)

OPINION 394 (Portunus Weber, 1795; Macropipus Prestandrea, 1833)
The family-group-name problems involved were dealt with by the Commission in the Ruling given in this Opinion.

OPINION 395 (specific name flavipes Olivier, 1795, as published in the combination Dytiscus flavipes)
This Opinion is concerned exclusively with specific-name problems.

OPINION 396 (Drosophila immigrans Sturtevant, 1921)
This Opinion is concerned exclusively with specific-name problems.

OPINION 397 (Hyalopterus Koch, 1854)
The generic name Hyalopterus Koch, 1854, was taken as the base for the name of a sub-tribe HYALOPTERII by Oestlund in 1920 (Contrib. Knowl. Group Aphidina, Fam. Aphididae : 69). This name has not been used by subsequent authors and was later abandoned by Oestlund himself. It is not proposed that it should be placed on the Official List.

OPINION 398 (pini Linnaeus, 1758, as published in the combination Aphis pini)
This Opinion is concerned exclusively with specific-name problems.
OPINION 399 (Lachnus Burmeister, 1835; Cinara Curtis, 1835)

The following names require to be placed on the Official List:
(a) LACHNINAE Passerini, 1863, Aphididae Ital. : [7] (type genus: Lachnus Burmeister, 1835)
(b) CINARINI Börner, 1930, Arch. klass. phyl. Entom. 1 : 125 (type genus: Cinara Curtis, 1835)

OPINION 400 (Melanargia Meigen, 1828)

The following action is required:
(i) To be placed on the Official List:

MELANARGIINAE Verity, 1920, Boll. Lab. ziol. Portici 14 : 56
(type genus: Melanargia Meigen, 1828)

(ii) To be placed on the Official Index:

AGAPESTINAE Verity, 1953, Farf. diurn. Ital. 5 : 3, 46 (type genus: Agapetes Billberg, 1820) (invalid (a) because a junior objective synonym of MELANARGIINAE Verity, 1920, the respective type genera of these taxa having the same nominal species as type species and (b) under Declaration 20 because the name of the type genus has been suppressed under the Plenary Powers).

2.
