**History of Case 1707**

An application from Prof Ray F. Smith (University of California, Berkeley, California, U.S.A.) for the conservation of the specific name of *Diabrotica undecimpunctata* Mannerheim, 1843 by the rejection of *Crioceris sexpunctata* Fabricius, 1792 was published in BZN 22: 246–247 (November 1965), together with support from six workers. No further action was taken at that time because the automatic rejection of nomina oblita such as *C. sexpunctata* was under review. A revised and expanded application, to include conservation of the subspecific name of *D. undecimpunctata howardi* Barber, 1947, was formulated by Dr P.K. Tubbs (International Commission on Zoological Nomenclature, c/o The Natural History Museum, London, U.K.) and published in BZN 48: 219–221 (September 1991). Notice of the case was sent to appropriate journals. It was noted on the voting paper that the case had the support of Dr Hans Silfverberg (Universitetets Zoologiska Museum, Helsingfors, Finland).

**Decision of the Commission**

On 1 September 1992 the members of the Commission were invited to vote on the proposals published in BZN 48: 220–221. At the close of the voting period on 1 December 1992 the votes were as follows:
