

value and present excellent condition of the collections are the result of his faithful and disinterested work. Recently the department has been placed in charge of Mr. Samuel Henshaw.

In a "partial catalogue" of the animals of Iowa published by the Iowa Agricultural College, Prof. H. Osborn enumerates 183 species of Ichneumonidae, Cynipidae and Tenthredinidae, 80 butterflies, 357 moths and 1255 Coleoptera.

Some interesting observations on the habits of the young of mole-cricket are given by Dr. E. W. Doran in Science for Oct. 14. Among other things he finds that previous to their first moult they can jump to the distance of five or six inches.

The notes and figures of Myriapoda left by the late A. Humbert are to be published shortly by the Société de physique et d'histoire naturelle of Geneva under the supervision of Dr. H. de Saussure. The text is

rather meagre but the figures are valuable and finely executed.

PROCEEDINGS OF SOCIETIES.

CAMBRIDGE ENTOMOLOGICAL CLUB.

14 October, 1892. — The 172d meeting was held at 156 Brattle Street. Mr. S. H. Scudder was chosen chairman and Mr. A. P. Morse secretary pro tem.

Mr. S. H. Scudder reported the capture of *Anthomaster leonardus* near Gardiner, Me., further east than it was before known; the female was seen laying eggs Aug. 29th on *Agrostis scabra*; these hatched in about 20 days, but the larvae refused ordinary grasses, and as they were as plump when a month old as when born, it seemed probable that their habit was to hibernate without first feeding.

Mr. S. Henshaw reported *Callidryas eubule* as not uncommon this year on Nantucket in the latter part of September.

The Butterflies of the Eastern United States and Canada.

With special reference to New England. By SAMUEL H. SCUDDER.
