

REVIEW.

STUDIES IN NORTH AMERICAN TRICHOPTERA, 1.

By Lorus J. Milne, Cambridge, Mass., April, 1934; 19 pp., small 8vo. (For sale by author, 50c, postage extra; Biological Institute, Harvard Univ., Cambridge, Mass.).

This includes keys to the North American genera and species of *Phryganeidæ*, *Molannidae* and *Leptoceridae*, check-lists of world *Phryganeidae* and *Molannidæ* and of North American *Leptoceridæ*, in each case with only the North American synonymy. Three new genera, five new subgenera, three new species, four new subspecies and one new name are proposed; five old genera are resurrected, nine types of old genera are elected and thirty new North American synonyms are quoted, from a study of the type material in the Museum of Comparative Zoology, of Hagen's and Banks' names.

1934. "Review: Studies in North American Trichoptera, 1." *Psyche* 41, 184–184.
