THE BULLETIN OF THE BRITISH MUSEUM
(NATURAL HISTORY), *instituted in 1949, is
issued in five series corresponding to the Departments
of the Museum, and an Historical series.*

*Parts will appear at irregular intervals as they become
ready. Volumes will contain about three or four
hundred pages, and will not necessarily be completed
within one calendar year.*

*In 1965 a separate supplementary series of longer
papers was instituted, numbered serially for each
Department.*

*This paper is Vol. 28, No. 3 of the Entomological
series. The abbreviated titles of periodicals cited follow
those of the World List of Scientific Periodicals.*

SYNOPSIS

All the genus-group names of the Zygaenidae (including variations in spelling) are listed alphabetically, with citations of their type-species. Bibliographical references are given to the original descriptions and to subsequent designations of type-species. Five new generic names are proposed to replace hitherto unrecognized junior homonyms, and four type-species are newly designated.

INTRODUCTION

THE following catalogue contains the genus-group names of the lepidopterous family Zygaenidae, comprising the subfamilies Anomoeotinae, Chalcosiinae, Charideinae, Himantopterinae, Phaudinae, Procridinae and Zygaeninae. Also included is the family Ratardidae which has recently been associated with the Zygaenidae (Alberti, 1954, *Mitt. zool. Mus. Berl.* **30** : 340). A number of genera originally described in the Zygaenidae are currently placed in other families; these are normally included in the catalogue for the sake of completeness and are marked with an asterisk (*). However, genera were erroneously described in the Zygaenidae during the latter half of the last century, following an erroneous concept of the family which included the Ctenuchidae (= Syntomidae) and Arctiidae as subfamilies; such genera currently placed in the Ctenuchidae and Arctiidae are not included here.

The type-species of each genus is given and the mode of fixation of the type-species stated, i.e., by original designation, by monotypy, by subsequent designation, or by present designation.

Each generic name has been checked for homonymy in the catalogues of Neave (1939-66, *Nomencl. zool.* **1-6**). The following new names are proposed for hitherto unrecognized junior homonyms which cannot be replaced by junior synonyms:

Cerodendra **nom. n.** for *Dendrocera* Hampson, [1893];

Cleoda **nom. n.** for *Doclea* Walker, 1864;

Euclimaciopsis **nom. n.** for *Euclimacia* Jordan, 1913;

Monalita **nom. n.** for *Lamontia* Kaye, 1923;

Neoherpa **nom. n.** for *Herpa* Walker, 1854.

The following hitherto unrecognized junior homonyms are replaced by junior subjective synonyms:

- Ninia* Walker, 1856, by *Cicinnocnemis* Holland, 1893;
Northia Walker, 1854, by *Zama* Herrich-Schäffer, 1856;
Paraphlebia Felder, 1874, by *Phlebohecta* Hampson, [1893];
Rhaphidognatha Felder & Felder, 1862, by *Balataea* Walker, 1864.

The following junior homonyms are currently considered to be junior subjective synonyms:

- Felderia* Kirby, 1892, synonym of *Pyromorpha* Herrich-Schäffer, 1854;
Ino Leach, 1815, synonym of *Adscita* Retzius, 1783;
 **Leptothrix* Heylaerts, 1892, synonym of *Chionaema* Herrich-Schäffer, 1856;
Libania Holik & Sheljuzhko, 1956, synonym of *Mesembrynus* Hübner, [1819].

The following junior homonym is replaced by a junior objective synonym:

- **Chrysaor* Hübner, [1809], by *Belemnia* Walker, 1854.

Names that have been proposed expressly to replace junior homonyms, and junior objective synonyms that have been used for the same purpose, are referred to in this catalogue as objective replacement names. Junior subjective synonyms that have been used to replace preoccupied senior synonyms are referred to as subjective replacement names.

Where the type-species is now a junior synonym, the current valid name is given in square brackets. For the genera, only objective synonymy is provided (in the form of cross-references) unless different type-species of different genera are currently considered to be conspecific, when subjective synonymy is also expressed. When different type-species of different genera are currently considered to be congeneric, subjective synonymy is not expressed unless it is necessary to replace a generic junior homonym by a junior subjective synonym. Subjective synonymy is dealt with, though not comprehensively, by Bryk (1936, *in* Strand, *Lepid. Cat.* **71** : 95-332) and Alberti (1954, *Mitt. zool. Mus. Berl.* **30** : 115-480).

The references to the original descriptions of the genera and their type-species have been checked and, whenever possible, the dates of publication are taken from original wrappers. Dates of publication of the works of Hübner and Herrich-Schäffer follow Hemming (1940, *Hübner* **1, 2**), and those of Esper follow Sherbörn & Woodward (1901, *Ann. Mag. nat. Hist.* (7) **7** : 137-140). Abbreviations of titles of periodicals follow Brown & Stratton (1963-65, *World List of Scientific Periodicals*, 4th edition, 1900-1960); those not included in that work follow the *List of Serial Publications in the British Museum (Natural History) Library* (1968). Titles of books are also abbreviated according to the principles of the 4th edition of the *World List*. The full titles of all works referred to that are not included in these two *Lists* are given in the Bibliography.

The generic names are arranged in alphabetical order; junior homonyms, junior synonyms, unavailable names, etc., are cross-referenced under the senior name. Junior homonyms, junior objective synonyms and unavailable names (*nomina nuda*, rejected names and incorrect spellings) are in non-bold italics; unavailable names are marked with a double dagger (‡). The alphabetical entries of all other generic

names are in bold italics, as are the names of their type-species. Fossil genera are marked with a single dagger (†).

ACKNOWLEDGEMENTS

I am indebted to Dr B. Alberti, Waren (Müritz), Mr B. J. Lempke, Amsterdam, and Dr L. Vári, Transvaal Museum, Pretoria, for valuable help and advice. I also thank my colleagues at the British Museum (Natural History), especially Mr D. S. Fletcher, Dr I. W. B. Nye, Dr K. Sattler, Mr W. H. T. Tams and Mr A. Watson for their advice and constructive criticism.

ALPHABETICAL CATALOGUE OF GENUS-GROUP NAMES

ACHELURA Kirby, 1892, *Synonymic Cat. Lepid. Heterocera* **1** : 56 (objective replacement name for *Chelura* Hope, 1841, nom. praeocc.).

Type-species: ***Chelura bifasciata*** Hope, 1841, *Trans. Linn. Soc. Lond.* **18** : 444, by monotypy of *Chelura* Hope, 1841.

See also: *Chelura* Hope, 1841.

ACOLOITHUS Clemens, 1860, *Proc. Acad. nat. Sci. Philad.* **1860** : 539.

Type-species: ***Acoloithus falsarius*** Clemens, 1860, *ibid.* **1860** : 539, by monotypy.

ACREAGRIS Felder, 1874, in Felder & Rogenhofer, *Reise öst. Fregatte Novara, Zool.* **2**(2), Lepid. 4, pl. 83, fig. 2; Erklärung der Tafeln LXXV bis CVII, p. [1] (nom. praeocc.).

Type-species: *Acreagris correbioides* Felder, 1874, *ibid.* 4, pl. 83, fig. 2, by monotypy.

Acreagris Felder, 1874, is a junior homonym of *Acreagris* Koch, 1845 (Insecta: Hemiptera); *Felderia* Kirby, 1892, which was proposed as the objective replacement name, is a junior homonym of *Felderia* Walsingham, 1887 (Lepidoptera, Tineidae). However, *Acreagris* Felder, 1874, is a junior subjective synonym of *Pyromorpha* Herrich-Schäffer, 1854. The type-species *Acreagris correbioides* Felder, 1874, is currently considered to be congeneric with *Pyromorpha dimidiata* Herrich-Schäffer, 1854, the type-species of *Pyromorpha* Herrich-Schäffer, 1854.

ADSCITA Retzius, 1783, in Degeer, *Genera et Species Insect.* : 8, 35.

Type-species: ***Adscita turcosa*** Retzius, 1783, *ibid.* : 35 [= *Sphinx statices* Linnaeus, 1758, *Syst. Nat.* ed. X, **1** : 495], by subsequent designation: Kirby, 1892, *Synonymic Cat. Lepid. Heterocera* **1** : 84.

See also: †*Atichia* Ochseneheimer, 1808; *Atychia* Ochseneheimer, 1808; *Bradyptesis* Sodoffsky, 1837; †*Chrysaor* Hübner, [1806]; *Ino* Leach, 1815; †*Jno* Püngeler, 1914; *Procris* Fabricius, 1807; †*Proeris* Pagenstecher, 1909.

AEACIS Hübner, [1819], *Verz. bekannt. Schmett.* : 117.

Type-species: ***Sphinx ephialtes*** Linnaeus, 1767, *Syst. Nat.* ed. XII, **1** : 806, by monotypy.

AETHIOPROCRIS Alberti, 1954, *Mitt. zool. Mus. Berl.* **30** : 305.

Type-species: ***Aethioprocris togoensis*** Alberti, 1954, *ibid.* **30** : 306, by original designation and monotypy.

AGALOPE Walker, 1854, *List Specimens lepid. Insects Colln Br. Mus.* **2** : 437.

Type-species: ***Agalope basalis*** Walker, 1854, *ibid.* **2** : 438 [= *Chalcosia hyalina* Kollar, 1844, in Hügel, *Kaschmir und das Reich der Siek* **4**(2) : 462], by monotypy.

AGLAINO Staudinger, 1887, in Romanoff, *Mém. Lépid.* **3** : 171.

Type-species: ***Aglaino maerens*** Staudinger, 1887, *ibid.* **3** : 171, by monotypy.

AGLAOPE Latreille, 1809, *Genera Crustac. et Insect.* **4** : 214.

Type-species: ***Sphinx infausta*** Linnaeus, 1767, *Syst. Nat.* ed. XII, **1** : 807, by monotypy.

See also: †*Aglope* Boisduval, 1836.

An incorrect subsequent spelling of *Aglaope* Latreille, 1809.

AGROMENIA Agassiz, 1846, *Nomencl. zool. Index univ.*: 12.

Type-species: *Sphinx onobrychis* [Denis & Schiffermüller], 1775, *Ankündigung syst. Werkes Schmett. Wienergegend*: 45 [= *Sphinx carniolica* Scopoli, 1763, *Ent. carniolica*: 189, fig. 478], by subsequent designation for *Agrumenia* Hübner, [1819].

An unjustified emendation of *Agrumenia* Hübner, [1819].

AGRUMENIA Hübner, [1819], *Verz. bekannt. Schmett.*: 116.

Type-species: *Sphinx onobrychis* [Denis & Schiffermüller], 1775, *Ankündigung syst. Werkes Schmett. Wienergegend*: 45 [= *Sphinx carniolica* Scopoli, 1763, *Ent. carniolica*: 189, fig. 478], by subsequent designation: Tremewan, 1961, *Entomologist's Rec. J. Var.* **73** : 202.

See also: *Agromenia* Agassiz, 1846.

AGRUMENOIDEA Holik, 1937, *Ent. Z.* **51** : 132.

Type-species: *Zygaena johanna* Le Cerf, 1923, *Bull. Soc. ent. Fr.* **1923** : 224, by original designation and monotypy.

Proposed as a subgenus of *Zygaena* Fabricius, 1775. Not recorded by Neave (1939–66, *Nomencl. zool.* **1–6**).

**AGYRTA* Hübner, [1820], *Verz. bekannt. Schmett.*: 177.

Type-species: *Sphinx auxo* Linnaeus sensu Hübner, [1817], *Samml. exot. Schmett.* **1**, pl. [185], figs 1, 2, by subsequent designation: Kirby, 1892, *Synonymic Cat. Lepid. Heterocera* **1** : 121.

The genus *Agyrta* Hübner, [1820], was erected for two nominal species, viz., *Sphinx auxo* Linnaeus, 1767, and *Phalaena caelestina* Stoll, [1781]. Under *auxo* Linnaeus, Hübner referred to his earlier interpretation of the species ([1817], *Samml. exot. Schmett.* **1**, pl. [185], figs 1–4), at the same time placing *Phalaena micilia* Cramer, [1779], in synonymy.

The true *Sphinx auxo* Linnaeus, 1767, is a species of Zygaenidae: Chalcosiinae described from China, whereas the specimens figured under this name by Hübner represent two South American species of the family Ctenuchidae (= Syntomidae). It should be noted that figs 1 and 2 represent a misidentification of *auxo* Linnaeus, and that figs 3 and 4 represent *micilia* Cramer, which is a distinct species. Kirby (loc. cit.) recognized that Hübner figured two different species under the same name, but like Hübner, misidentified *Sphinx auxo* Linnaeus, which is cited as the type-species of *Agyrta* Hübner.

It follows that the type-species of *Agyrta* Hübner, [1820], is *Sphinx auxo* Linnaeus sensu Hübner, [1817], by subsequent designation by Kirby (1892, loc. cit.). This misidentified species is at present without a name, as no synonym is apparently available. The genus *Agyrta* Hübner, [1820], remains in the Ctenuchidae as originally placed by Kirby, while the true *Sphinx auxo* Linnaeus, 1767, should be placed in the Zygaenidae: Chalcosiinae as a synonym of *Sphinx pectinicornis* Linnaeus, 1758 (Bryk, 1936, in Strand, *Lepid. Cat.* **71** : 220).

AKESINA Moore, 1888, *Proc. zool. Soc. Lond.* **1888** : 395.

Type-species: *Akesina basalis* Moore, 1888, *ibid.* **1888** : 396, by monotypy.

Originally described in the Psychidae but subsequently transferred to the Zygaenidae (Jordan, 1907, in Seitz, *Gross-Schmett. Erde* **10** : 8).

***ANOMOCOETIDIA** Strand, 1912, *Arch. Naturgesch.* **78**(A)₁₂ : 58.

Type-species: *Anomocoetidia basifulva* Strand, 1912, *ibid.* **78**(A)₁₂ : 58, by monotypy.

Originally described in the Zygaenidae; subsequently transferred to the Geometridae (Hering, 1927, in Seitz, *Gross-Schmett. Erde* **14** : 198).

ANOMOEOTES Felder, 1874, in Felder & Rogenhofer, *Reise öst. Fregatte Novara, Zool.* **2**(2), Lepid 4, pl. 100, fig. 5; Erklärung der Tafeln LXXV bis CVII, p. 1.

Type-species: *Anomoeotes levis* Felder, 1874, *ibid.* 4, pl. 100, fig. 5, by monotypy.

See also: †*Anamoeotes* Holland, 1893; ‡*Anomocoetes* Strand, 1912.

ANTERIS Wallengren, 1865, *K. svenska VetenskAkad. Handl.* (N.F.) **5**(4) : 16 (nom. praeocc.).

Type-species: *Neurosymploca zelleri* Wallengren, 1860, *Wien. ent. Monatschr.* **4** : 39, by original designation and monotypy.

Anteris Wallengren, 1865, is a junior homonym of *Anteris* Foerster, 1856 (Insecta: Hymenoptera); *Zutulba* Kirby, 1892 was proposed as the objective replacement name.

ANTHILARIA Hübner, [1819], *Verz. bekannt. Schmett.* : 117.

Type-species: *Sphinx spicae* Hübner, [1796], *Samml. eur. Schmett.* **2** : 17, pl. 4, fig. 25 [= *Sphinx lavandulae* Esper, [1783], *Schmett.* **2** : 221, pl. 34, fig. 2], by PRESENT DESIGNATION.

The designation of *Sphinx lavandulae* Esper, [1783] by Tremewan (1961, *Entomologist's Rec. J. Var.* **73** : 202) is incomplete and therefore invalid. Hübner ([1819] : 117) included two nominal species, *Sphinx spicae* Hübner and *Sphinx lavandulae* Esper, but misidentified the latter. The first included nominal species, *Sphinx spicae* Hübner, is synonymous with the true *Sphinx lavandulae* Esper; the second, *Sphinx lavandulae* Esper sensu Hübner, is synonymous with *stoechadis* Borkhausen, a subspecies of *filipendulae* Linnaeus.

When Tremewan designated *Sphinx lavandulae* Esper as the type-species, it was not realised that Hübner's interpretation of this species was in fact a misidentification; it follows that the included nominal species *Sphinx spicae* Hübner [= *Sphinx lavandulae* Esper] should have been cited, as designated above.

ANTHRACOCERA Agassiz, 1846, *Nomencl. zool. Index univ.* : 26.

Type-species: *Sphinx filipendulae* Linnaeus, 1758, *Syst. Nat.* ed. X, **1** : 494, by monotypy of *Anthrocera* Scopoli, 1777.

An unjustified emendation of *Anthrocera* Scopoli, 1777.

ANTHROCERA Scopoli, 1777, *Introductio Hist. nat.* : 414.

Type-species: *Sphinx filipendulae* Linnaeus, 1758, *Syst. Nat.* ed. X, **1** : 494, by monotypy. *Anthrocera* Scopoli, 1777, is a junior objective synonym of *Zygaena* Fabricius, 1775.

APHANTOCEPHALA Felder, 1861, *Sber. Akad. Wiss. Wien* **43**(1) : 30.

Type-species: *Aphantocephala moluccarum* Felder, 1861, *ibid.* **43**(1) : 30, by monotypy.

ARACHOTIA Moore, 1879, in Hewitson & Moore, *Descr. new Indian lepid. Insects Colln Atkinson* : 14.

Type-species: *Arachotia flaviplaga* Moore, 1879, *ibid.* : 14, by monotypy.

 Type-species: ***Atelesia nervosa*** Jordan, 1930, *ibid.* **35** : 284, by original designation and monotypy.
- ‡**ATICHIA** Ochseneimer, 1808, *Schmett. Eur.* **2** : 11.
 An incorrect original spelling of the multiple original spelling of *Atychia* Ochseneimer, 1808.
- ATYCHIA** Ochseneimer, 1808, *Schmett. Eur.* **2** : [9], [10]; 11 (as *Atichia*).
 Type-species: ***Sphinx statices*** Linnaeus, 1758, *Syst. Nat.* ed. X, **1** : 495, by PRESENT DESIGNATION.
Atychia Ochseneimer, 1808, is a junior subjective synonym of *Adscita* Retzius, 1783. The type-species, *Sphinx statices* Linnaeus, 1758, is currently considered to be conspecific with *Adscita turcosa* Retzius, 1783, the type-species of *Adscita* Retzius.
 The designation of *Sphinx statices* Linnaeus by Boisduval (1836, *Species général Lépid.* **1** : 134) is invalid. According to the provisions of the Code (*Int. Code zool. Nomencl.*, Article 69 (a) (iii)) an author is considered to have designated one of the originally included nominal species as type-species, if he states that it is the type, and if it is clear that he himself accepts it as type-species. In the introduction to his work Boisduval reviewed earlier classifications and designated up to at least four different type-species for each genus, and cited no type-species for the genera used by him in his own classification. The type-species designations by Boisduval do not conform with the provisions of the Code and are therefore invalid.
- BALATAEA** Walker, 1864, *List Specimens lepid. Insects Colln Br. Mus.* **31** : 110.

‡**CHARICLEA** Hampson, 1918, *Novit. zool.* 25 : 378.

An incorrect subsequent spelling of *Charidea* Dalman, 1816.

CHARIDEA Dalman, 1816, *K. svenska VetenskAkad. Handl.* 1816 : 225 (objective replacement name for *Glaucopis* Fabricius, 1807, *nom. praeocc.*).

Type-species: *Zygaena argynnis* Fabricius, 1781, *Species Insect.* 2 : 161 [= *Sphinx hypparchus* Cramer, [1779], *Uitl. Kapellen* 3 : 7, pl. 197, fig. C; [1780], *ibid.* 3 : 175], by subsequent designation: Kirby, 1892, *Synonymic Cat. Lepid. Heterocera* 1 : 169.

Kirby (*loc. cit.*) designates *Sphinx hypparchus* Cramer, [1779], as the type-species with *Zygaena argynnis* Fabricius, 1781, in synonymy; this automatically designates the type-species of *Glaucopis* Fabricius, 1807, which is placed in synonymy, and of *Marmax* Rafinesque, 1815, a replacement name for *Glaucopis* Fabricius.

Charidea Dalman, 1816, is an unnecessary replacement name for *Glaucopis* Fabricius, 1807 and a junior objective synonym of *Marmax* Rafinesque, 1815.

CHARMONA Billberg, 1820, *Enumeratio Insect. Mus. Billberg*: 82.

Type-species: *Sphinx pectinicornis* Linnaeus, 1758, *Syst. Nat.* ed. X, 1 : 495, by PRESENT DESIGNATION.

Type-species: *Dendrocera quadripunctata* Hampson, [1893], *ibid.* **1** : 231, by original designation and monotypy.

Dendrocera Hampson, [1893], is a junior homonym of *Dendrocera* Lamarck, 1817 (Insecta : Coleoptera), and is here replaced by *Cerodendra* nom. n.

DEVANICA Moore, 1884, *Trans. ent. Soc. Lond.* **1884** : 355 (objective replacement name for *Sephisa* Moore, 1882, nom. praeocc.).

Type-species: *Eterusia cingala* Moore, 1877, *Ann. Mag. nat. Hist.* (4) **20** : 343 [= *Pap[ilio] aedea* Clerck, [1763], *Icones Insect. rariorum* (2), pl. [41], fig. [2]], by monotypy of *Sephisa* Moore, 1882.

Devanica Moore, 1884, was cited as a new genus without a description, but with *Sephisa* Moore, 1882, in synonymy.

The type-species *Eterusia cingala* Moore, 1877, is currently considered to be a junior subjective synonym (subspecies) of *Pap[ilio] aedea* Clerck, [1763]. It should be noted that *Pap[ilio] aedea* Clerck has been erroneously dated 1759 by various authors, including Bryk (1936, in Strand, *Lepid. Cat.* **71** : 206). Although the name was published by Clerck in part 2 of *Icones Insectorum rariorum*, the title page of which is dated 1764, it is evident that the plate was issued before this date as Linnaeus, in 1763 (*Amoenitates Acad.* **6** : 403), refers to many of Clerck's plates which form part 2 of his work. The name *Pap[ilio] aedea* Clerck should therefore be dated from [1763].

LAMPROCHRYSA Hampson, 1918, *Novit. zool.* **25** : 378 [key], 379.

Type-species: *Diospage triplex* Plötz, 1880, sensu Hampson, 1918, *ibid.* **25** : 379 [= *Diospage scintillans* Butler, 1893, *Proc. zool. Soc. Lond.* **1893** : 675, pl. 60, figs 12, 13], by original designation and monotypy.

When proposing this genus, Hampson (loc. cit.) based his description on the type-specimens of *Diospage scintillans* Butler, which he incorrectly placed in synonymy under *Diospage triplex* Plötz, without examining the type of the latter species. Gaede (1926, in Seitz, *Gross-Schmett. Erde* **14** : 26) considered *scintillans* Butler to be a distinct species, retaining it in the genus *Lamprochrysa*, and placed *triplex* Plötz in the genus *Syringura* Holland (Gaede, loc. cit.: 33).

Type-species: *Sphinx plumipes* Drury, 1782, *Ill. exot. Insects* **3** : 3, pl. 2, fig. 3; Index, p. [77] [= *Cicinnocnemis cornuta* Holland, 1893, *Jl N. Y. ent. Soc.* **1** : 181], by monotypy.

The type-species, *Sphinx plumipes* Drury, 1782, is a junior, primary homonym of *Sphinx plumipes* Drury, 1773, (Lepidoptera, Ctenuchidae (= Syntomidae)); it may be replaced by *Cicinnocnemis cornuta* Holland, 1893, which is currently considered to be a junior, subjective synonym.

Ninia Walker, 1856, is a junior homonym of *Ninia* Baird & Girard, 1853 (Reptilia), and may be replaced by its junior subjective synonym *Cicinnocnemis* Holland, 1893.

NORTHIA Walker, 1854, *List Specimens lepid. Insects Colln Br. Mus.* **1** : 141 (nom. praeocc.).

Type-species: *Glaucopis nigrigemma* Walker, 1854, *ibid.* **1** : 141, by monotypy.

Walker (loc. cit.) included two nominal species in the genus *Northia* Walker, 1854, viz., *nigrigemma* Walker and *auxo* Linnaeus; however, the latter was doubtfully included, consequently *nigrigemma* is the type-species by monotypy.

Northia Walker, 1854, is a junior homonym of *Northia* Gray, 1847 (Mollusca); it may be replaced by its junior subjective synonym *Zama* Herrich-Schäffer, 1856. The type-species *Glaucopis nigrigemma* Walker, 1854, is currently considered to be conspecific with *Zama cyanecula* Herrich-Schäffer, 1856, the type-species of *Zama* Herrich-Schäffer.

NOTIOPTERA Butler, 1876, *J. Linn. Soc. (Zool.)* **12** : 355, pl. 28, fig. 2.

Type-species: **Syntomis dolosa** Walker, 1856, *List Specimens lepid. Insects Colln Br. Mus.* **7** : 1594, by original designation.

ONCEROPYGA Turner, 1906, *Trans. R. Soc. S. Aust.* **30** : 137.

Type-species: **Onceropyga anelia** Turner, *ibid.* **30** : 137, by monotypy.

OPISOPLATIA Jordan, 1907, in Seitz, *Gross-Schmett. Erde* **10** : 30.

Type-species: **Opisoplatia grandis** Jordan, 1907, *ibid.* **10** : 31, by monotypy.

ORNA Kirby, 1892, *Synonymic Cat. Lepid. Heterocera* **1** : 81 (objective replacement name for *Euctenia* Felder, 1874, nom. praeocc.).

Type-species: **Euctenia zygaenoides** Felder, 1874, in Felder & Rogenhofer, *Reise öst. Fregatte Novara*, *Zool.* **2**(2) *Lepid.* 4, pl. 82, fig. 21; Erklärung der Tafeln LXXV bis CVII, p. 4, by monotypy for *Euctenia* Felder, 1874.

See also: *Euctenia* Felder, 1874.

‡†**PALAEOZYGAENA** Reiss, 1936, *Ent. Rdsch.* **53** : 556 (nomen nudum).

Although associated with *Zygaena miocaenica* Reiss, 1936, the name can only be treated as a nomen nudum and is therefore unavailable. Reiss (loc. cit.) stated that he would not wish to erect a new genus such as *Palaeozygaena* for the species.

PAMPA Walker, [11.ii.] 1854, *List Specimens lepid. Insects Colln Br. Mus.* **1** : 238.

Type-species: *Euchromia mystica* Walker, 1854, *ibid.* **1** : 239, by subsequent designation: Kirby, 1892, *Synonymic Cat. Lepid. Heterocera* **1** : 112.

Kirby (loc. cit.) replaced the name *Pampa* Walker, 1854, by *Nesace* Kirby, 1892, as the former was erroneously considered to be a junior homonym of *Pampa* Reichenbach, 1854 (Aves). Neave (1940, *Nomencl. zool.* **3** : 543) considered *Pampa* Walker, 1854 to be a senior homonym and therefore available. The exact date of publication of *Pampa* Reichenbach is unknown, but it is known by external evidence that *Pampa* Walker was published on 11.ii. 1854; the latter should therefore take priority.

PANHERPINA Bryk, 1936, in Strand, *Lepid. Cat.* **71** : 192.

Type-species: *Herpa basiflava* Oberthür, 1891, *Étud. d'Ent.* **15** : 21, pl. 3, fig. 25, by original designation and monotypy.

PARAPHLEBIA Felder, 1874, in Felder & Rogenhofer, *Reise öst. Fregatte Novara, Zool.* **2**(2), *Lepid.* **4**, pl. 83, fig. 6; Erklärung der Tafeln LXXV bis CVIII, p. 7 (nom. praeocc.).

Type-species: *Paraphlebia lithosina* Felder, 1874, *ibid.* **4**, pl. 83, fig. 6, by monotypy.

Paraphlebia Felder, 1874, is a junior homonym of *Paraphlebia* Selys, 1861 (Insecta : Odonata), and may be replaced by its junior subjective synonym *Phlebohecta* Hampson, [1893]. The type-species *Paraphlebia lithosina* Felder, 1874, is currently considered to be congeneric with *Soritia fuscescens* Moore, 1879, which is the type-species of *Phlebohecta* Hampson.

PARASYNTOMIS Distant, 1897, *Ann. Mag. nat. Hist.* (6)**20** : 15, 16.

Type-species: *Parasyntomis aethiops* Distant, 1897, *ibid.* (6)**20** : 15, 16, by monotypy.

Placed in the Zygaenidae by Janse (1917, *Check-list S. Afr. Lepid. Heterocera*: 140).

Type-species: *Perrotia tamatavana* Oberthür, 1922, *ibid.* **19**(1) : 153, by monotypy.

Perrotia Oberthür, 1922, is a junior homonym of *Perrotia* Oberthür, 1916 (Lepidoptera, HesperIIDae); *Boisduvalodes* Viette, 1955, was proposed as the objective replacement name. Originally described in the Megalopygidae; subsequently transferred to the Zygaenidae : Phaudinae (Jordan, 1928, *Novit. zool.* **34** : 132), and Zygaenidae : Anomoeotinae (Alberti, 1954, *Mitt. zool. Mus. Berl.* **30** : 201). Here transferred to the Somabrachyidae (Tams, in litt.).

SEMIOPTILA Butler, 1887, *Ann. Mag. nat. Hist.* (5)20 : 180.

Type-species: *Semioptila torta* Butler, 1887, *ibid.* (5)20 : 181, by monotypy.

SEPHISA Moore, [xii.] 1882, *Lepid. Ceylon* 2 : 41 (nom. praeocc.).

Type-species: *Eterusia cingala* Moore, 1877, *Ann. Mag. nat. Hist.* (4)20 : 343 [= *Pap[ilio] aedea* Clerck, [1763], *Icones Insect. rariorum* (2), pl. [41], fig. [2]], by monotypy.

Sephisa Moore, [xii.] 1882, is a junior homonym of *Sephisa* Moore, (vi.) 1882 (Lepidoptera, Nymphalidae); *Devanica* Moore, 1884, was proposed as the objective replacement name.

The type-species *Eterusia cingala* Moore, 1877, is currently considered to be a junior subjective synonym (subspecies) of *Pap[ilio] aedea* Clerck, [1763]. It should be noted that *Pap[ilio] aedea* Clerck has been erroneously dated 1759 by various authors, including Bryk (1936, in Strand, *Lepid. Cat.* 71 : 206). Although the name was published by Clerck in part 2 of *Icones Insectorum rariorum*, the title page of which is dated 1764, it is evident that the plate was issued before this date as Linnaeus (1763, *Amoenitates Acad.* 6 : 403), refers to many of Clerck's plates which form part 2 of his work. The name *Pap[ilio] aedea* Clerck should therefore be dated from [1763].

Proposed as a subgenus of *Zygaena* Fabricius, 1775. Not recorded by Neave (1939-66, *Nomencl. zool.* 1-6).

‡**SINICA** Rebel, 1915, *Verh. zool.-bot. Ges. Wien* 65 : (205) (nomen nudum).

‡*Sinica* Rebel, 1915, was treated by Neave (1940, *Nomencl. Zool.* 4 : 200) as an available name. However, it was published without a description or associated species, and is currently placed in synonymy under *Pryeria* Moore, 1877. The name probably originated in error for *Pryeria* Moore, 1877, of which *Pryeria sinica* Moore, 1877, is the type-species.
