

FURTHER NOTES ON THE DATES OF ISSUE OF THE PARTS  
OF SOWERBY'S *CONCHOLOGICAL ILLUSTRATIONS*.

By A. REYNELL.

Read 10th June, 1910.

THE following notes are to supplement Mr. H. O. N. Shaw's paper on the same subject read on March 12, 1909, and had I been aware at the time he had this work in hand I should have been only too glad to have let him have the use of my imperfect copy of the book to have extended his table.

My copy consists of about a hundred complete parts, viz.: 1-20, 25-42, 52-85, 141-70, plates only of parts 173-84 and 185-92.

During the time I was at work on the Mollusca collected by the "Huxley" from the north side of the Bay of Biscay, I had trouble in fixing the date of G. B. Sowerby's description of *Nucula nitida*, which did not seem to be mentioned in any of the many works I referred to. This made me doubt if the dates of issue of the parts of the work under consideration were published or generally known.

I much regret my copy is not complete enough to finish the work Mr. Shaw has begun, but I thought what I could add might be worth publishing.
