On motion, the President was authorized to appoint at his leisure the Standing Committees of the Society, which were subsequently reported by him as follows:

Library.

Jesse Y. Burk, William H. Greene.

Mr. William Blasius read a paper, "Is the Signal Service Degenerating?" and subsequently made some oral remarks on subjects connected with meteorology in general.

Dr. Morris offered a suggestion as to the probable equivalent in our modern English speech of the ancient Hebrew word—Amen. Sometimes such equivalents may be found in terms that are marked in our dictionaries as obsolete, or provincial, or in terms now in use only among the lower and more ignorant classes. Thus he had on one occasion been much struck by the description given by an unlettered negro, of a certain pain as a "gugawing" one. We can, in this case, easily trace the origin, as of a dog gnawing at a bone. So, in rendering our assent to a proposition forcibly, we often, to-day, do so with a nod of the head and the utterance of a sound better represented by the letters m'h'n, than by any other. Is not this then to be regarded as the modern representative of this form of earnest solemn assertion?

The Committee on the Communication of Prof. Goodfellow

and the Resolution of Prof. Lesley in relation to the U. S. Coast Survey, reported the following preamble and resolutions, which were unanimously adopted:

WHEREAS, The American Philosophical Society having a deep interest in scientific investigation, has heretofore taken occasion to express its opinion as to the propriety of the appointment of scientific men for high scientific positions;

AND WHEREAS, The American Philosophical Society recognizes the advisability of appointing as Superintendent of the Coast and Geodetic Survey a man of the highest ability, experience and character, be it therefore,

Resolved, That this Society regards Richard Meade Bache as one fulfilling all these requirements; that his training on the Survey for a period of nearly forty years, his familiarity with its methods and history, his general knowledge and scientific culture, would make the appointment an eminently fit one, and would assure to the work the maintenance of that high standard of usefulness to the people and to the Government which it reached under the distinguished administrations of Alexander Dallas Bache and Benjamin Peirce.

Resolved, That this Society recommend the said Richard Meade Bache as in every way qualified for the Superintendency of the Survey.

Resolved, That a Committee of three members of this Society be appointed to proceed to Washington and lay there these resolutions before the President.

The President of the Society and Messrs. Dudley and Haupt were appointed the Committee referred to in the resolution.

And the Society was adjourned by the President.

Stated Meeting, February 1, 1889.

Present, 16 members.

Vice-President, Dr. RUSCHENBERGER, in the Chair.

A letter from the Marchese Antonio de Gregorio (Palermo), accepting membership.

1889. "Stated Meeting, January 18, 1889." *Proceedings of the American Philosophical Society held at Philadelphia for promoting useful knowledge* 26(129), 291–294.
