

STUDIES IN THE HELIANTHEAE (ASTERACEAE). XVI.

A NEW SUBTRIBE, ENHYDRINAE.

Harold Robinson

Department of Botany

Smithsonian Institution, Washington, DC., 20560.

The completed review of the tribe Heliantheae shows the need to recognize an additional subtribe which is validated here.

Enhydrinae H. Robinson, subtribus nov.

Plantae herbaceae aquatica; folia opposita.

Inflorescentiae axillares sessiles. Capitula paleacea. Flores radii fertiles feminei; corollae minute limbatae adaxialiter laeves; flores disci hermaphroditici; corollae adaxialiter laeves; thecae antherarum pallide nigrescentes, cellulis endothecialibus quadratis in parietibus transversalibus 1-noduliferis; appendices antherarum ovatae abaxialiter glanduliferae; lineae stigmataceae duplices; canales resiniferi in faucis solitarii interdum rubrescentes, ductis in stylis interioribus. Achaenia prismatica nigrescentia striata; cellulae superficiales ovularum inornatae. Pappus nullus. Grana pollinis ca. 27-35  $\mu$  in diam.

Type genus: Enhydra Lour.
