

Cotton Cal^a Feb 16th /82

Dear Watson

By this mail I
send last installment of
plants coll 1881

I leave out such as are
well known, or not desirable.
Please fill out the blanks
or make any corrections.
You will find them separated
into 4 parcels Polyket, Mimket,
Asket, & Endogens. As you will
want to see the Mimket, which
includes a few loose Compositae.
You will find Chorizanthe
pretty well represented.

What do you make of 264?
I do not feel clear on the
distinction of Polygonum freeneri
in P. Californica

Ma peene calls

245. P. peenei Watson

and 246. P. California (Chico)

This last you had named in

Mr Bidwells plants. P. peenei

are they really distinct?

I have just returned proofs

of my Oxytheca paper from

Davenport Acad. I have asked

to send first page proof to

Cambridge.

Vegetation is starting but

the country is dry. only 2 inches

of rain - more at San Diego

Yours

C. C. Parry

Parry, C. C. 1882. "Parry, C. C. Feb. 16, 1882 [to S. Watson]." *Charles Christopher Parry letters to Asa Gray*
