

He offered to look again  
at any of Wright's Cuban  
Ferns; so I sent him  
the numbers of a dozen  
of them, & will delay  
publishing the list till  
September. He says he  
will be glad to see the ferns  
from the Chinese seas.

I hope you are saving  
out for me some of the  
Sycophods of Rodger's Exh.  
The Cycas leaf I am  
sorry to have left behind,  
Please save it for me to  
get at some future time

(1)

New Haven, June 1. '58  
Dear Doctor.

I have just  
come from the Railway  
Station where I have  
seen Fanny off for  
Litchfield, where she  
expects to be for some  
months, at Mr. Rufus Smith.

I have now lectured  
twice to a class of about  
40, (two thirds of them are  
young ladies) and have,  
I believe, given general  
satisfaction. I shall

in a very few days commence practical classes in analyzing plants, and in teaching the structure of them by aid of the microscope.

These classes will be entirely independent of the lectures. I am getting a lot of books bound from the proceeds & expect soon to send for that set of Lindbergh's plants. After these things if the money holds

out I am going to get up a Ward's Case.

You don't know how rich & independant I feel.

A letter from Hooker came the other day.

He says the puzzling "*Athyrium cystopteroides*" is new to him, but calls it a Lasaea (Nephrodium)

About the Hong Kong Trichomanes; he calls my new one *T. pumilum* - but he will have to take it back when he sees both species together.

may be lacking in some  
other set. I have not found  
Pl. Col. Kotzeby in Syria &c.  
nor have ~~not~~ I a paper on  
"Oxyera" (Oxyria?) - You  
gave me two copies of the  
text of Miquelian piperaceae.

Ever truly yours  
Daniel C. Eaton.

Grammer says the  
microscopes will be ready  
the 10th of June

D.C.E.

(2.)  
I hope that the recently  
deceased E. G. Loring was  
not a near relative of  
Mrs. Gray. If I remember  
correctly he was not.

I am collecting very  
thoroughly this summer,  
& hope to go to the White  
Mts in August.

Partwell takes two dozen  
of Blytt's Canices, & promises  
to collect Fenis & orchids.  
Trall Green promises to collect  
for me. A classmate in  
Cincinnati will do something

I will Dr. Short, Frost,  
Geo. Cook & boys in New-  
Jersey, and a Senior in  
William's College.

But I have no one  
South nor North West.

The Sillimans expect  
Dr Torrey here next Saturday  
to stay over Sunday. I  
hope to see him in  
my study.

When shall we see  
Dr. Gray & Mrs. Gray  
at 49 Elm St?

I will see you before  
I send off the letter,

Pamplin has a copy  
of Schkuhr's *Filices* for  
me - colored plates. £ 10.<sup>d.</sup>  
with ~~the~~ autograph letter of  
Schkuhr.

My copy of Blume's Flora  
Javae has colored plates.  
but half the text of  
Loranthaceae is wanting.

The plates to Gray's Bot.  
U.S. Expl. Exed. I have  
had bound in half green  
Turkey Morocco - for \$ 5.00.  
There is a duplicate of Plate 76.  
(*Haplópetalon Richii*) I will  
save it for you as it
