

Camp Die Lewis Party  
near San Jose May 13<sup>th</sup> '78.

My dear Dr.

Enclosed I send specimens of two little things - No 1400 from this vicinity on a high ridge. No 1401 (the Arenaria?) from summit of Mt Hamilton, near site of Lick Observatory.

The first is an odd thing, apetalous & therefore not reached by Cal Bot.

My dear Dr I am sorry to trouble you but in the confusion of breaking up in Alameda I lost my copy of your last Contribution - April 8.

Can you send me other copies?

I know I've just asked favors of the same kind but - I trust - to your large heart.

Yours truly

J. L. Leamon
