

4 My dear Sir. Columbus. Nov^r. 30th 83.

Schimper. Syn. Ed 2, p. 484 describes H^l. *M. riparium* ¹⁸⁷⁴
and remarks: - ~~Fructus~~ Specimina quae sub hoc nomine
e Suecia et Norvegia accepti nullo modo a *M. orthorhyncho*
differunt. - and after. - Fructus rarius reperiuntur; plan-
tae masculae contra, suis locis copiose proveniunt. Non
nisi statura humilior, gracilior, foliis minus longis
pauculum laxius areolatis, capsula molliore a *M. Orthorhyncho*
differt and viz. Hucus propria. - Clas. Lindberg plantam
hanc sine ratione cum *Lycopodioidi* commutavit, tam statu-
ra multo pauciore, quam capsula longiore and subarcuata and
prospernis sporis dimidio minoribus distincto. - Schimper
is right it should have older foliis longioribus angustioribus
rigidioribus etc. - Both species *M. Lycopodioides* (not rarely)
M. orthorhynchum (very rarely) were found in Am. We have never seen
any thing like *M. riparium*. Very truly yours A. Desqueuesnes
The European *M. Lycopodioides* is larger and!

NOTHING BUT THE ADDRESS CAN BE PLACED ON THIS SIDE.

Prof Sereno Watson
Botanic Garden
Cambridge
Mass.

Lesquereux, Léo. 1883. "Lesquereux, Léo Nov. 30, 1883 [to S. Watson] [postcard]." *Leo Lesquereux letters to Asa Gray*
