

DIREZIONE
DELL' ORTO BOTANICO
DELLA R. UNIVERSITÀ DI PISA

9 January 1852

My dear Professor

You may well be surprised at receiving no letter from me, and no acknowledgement of the parcel you have sent me. The fact is that in August last I had a note from the Secretary of the Smithsonian, apprising me of the package as having been directed to me at the Museo in Florence; receiving nothing, after some time I enquired at the Museo, and then at all the public offices that could possibly know something of the business, and at last wrote to Mr. Bell Agassiz, the agent of the Smithsonian in Milan, from whom I had no answer — and now poor fellow there is no more applying to him, as I have just seen in the papers that he has been found dead in one of the canals in

Milan, and to all appearances ~~unpublished~~. I regret the more this deficiency in the communications with America by means of the Smithsonian, as I do have a book which I very much wish to send you (a work on the geographical botany of France) and don't know how to do it, I dare not trust it to the post, as once it happened to me that a parcel of books sent to Dr. Engelmann, tho' prepared here by me, was charged to him at a preposterous rate, several dollars I believe.

My waiting month after month for the parcel has also been the reason for which I have not written to you as yet, to inform you of the sudden and most welcome change in my position which took place in the spring of last year, by my being appointed to the professorship of botany in the University

here in the directorship of the botanical gardens. Since October I am established here with my family. The Lisa is a dull town, not to be compared to Florence for its resources, yet we are very well off under other respects, myself especially, as I have plenty of work to my liking, sufficient materials for study, and a position amongst the best to be had in Italy in our branch.

Mr. Ricceri, whom you no doubt recollect, has again left Italy for the Indian Archipelago, with the intention of visiting New Guinea. He has left me the management of the Italian journal of botany.

I hope my dear Professor to hear from you ere long, and to have satisfactory news of the health of Mrs. Grey, to whom I beg to be respectfully remembered. With my best regards I remain

Yours sincerely
J. Caruel

P.Y. If in my present abode I may be
of any use to you in a botanical or any
other way, pray reckon on my best
endeavours.

I am now as busy as ever in the
house & garden, with some
success, though slow. I have
had a good deal of difficulty
in getting the ground to fit
so well as my mother's, so
that I have had to
dig up the old stones & weeds
and lay them aside, which
has cost me a great deal of
time & trouble. I have
done my best to get rid of
the old stones & weeds, but
it has been difficult to
get rid of all of them, as
they are very numerous
and scattered about. I have
also had to dig up the old
stones & weeds, which
has been a great deal of
work, but I have done
as much as I can, and
I hope to have it all
done by the end of the
month. I will let you know
when I have finished, so
you can come and
see it.

Caruel, Teodoro. 1872. "Carnel, Teodoro Jan. 9, 1872." *Asa Gray correspondence*
