D " <i>Penstemon antiochioides</i> ,	Potero	Sept 20/6,

I found great difficulty in obtaining even the few seeds of *Mirabilis multiflora* I send to you. They will ~~not~~ germinate and grow. I feel sure, the flower is handsome.

If I can be of service to you here do not hesitate to command me.

Very truly yours
D. Cleveland

457. I found only one plant, the only one I ever saw. It was not more than two feet tall. The other plants of this genus bloom in the Spring. It seems to me that this must be new. I could find only three good specimens ⁱⁿ blossoms, two of which — the best — I send to you.

Cleveland, Daniel. 1876. "Cleveland, Daniel Oct. 13, 1876." *Asa Gray correspondence*
