

BOTANICAL DEPARTMENT.

PRESIDENT MERRILL E. GATES,  
ACTING DIRECTOR.

PROF. BYRON D. HALSTED,  
BOTANIST AND HORTICULTURIST.

New Jersey

Agricultural College Experiment Station,

New Brunswick, N. J., June 26<sup>th</sup> 98

Mr John Robinson  
Salem Mass.

My Dear Sir - The specimens  
of Button woods from you have been examined this  
morning and I find that there is an abundance  
of the Anthracnose (Gleosporium nervisequum) upon  
the older leaves. There is no doubt but that  
the trouble is the same as noted in Linden and  
Lonch. I am very glad to hear from you  
and shall at all times be pleased to  
answer any questions that come to you in  
my line -

Yours very sincerely  
Byron D. Halsted
