

25, WILTON PLACE,
S.W.

Nov 19/67

My dear Gray

I have examined the three Umbellifera you have sent *Obrazacina Hartwegii* & *Kellogii* & a 3^d from Botnia, Kelley — the difficulty about putting them into *Obrazacina* is the entire Corolla which transfers them to *Conium*. Indeed as far as the specimen goes the 3^d plant from Botnia looks mighty like (smells like too) our own *Conium maculatum* which as the (1) seed usually like this. But not an introduced specimen of the European plant which is very likely to get out there as a weed.

As to putting *Endlicheria* into *Obrazacina* there is certainly little

NOV 19 MULHILL 32
W.B.

hence, policy to reparate them
but if we do join them we cannot
help reducing both to insignificance
the latter has usually been ~~reduced~~ ^{to} but
it comes pretty nearly to that in some
circumstances

do you wish the reply soon from
his opposition without waiting
to add copies which I have just
now no time to write

Very yours
George Bradham

After it paid they say postage
is to be reduced by half which will
make one hesitate less about writing
short letters
