

7 Brompton Terrace
Regent's Park.
London. N.W.

My dear Professor Gray..

I am much obliged
to you for your kind
letter; I was ^{not} in the
least aware the idea
of a dispersion from
N. to S. had been
previously advanced;
but am glad to hear
I am not alone in
thinking it more
probable than along
latitudes. If I
can find the papers
you allude to, at the

Limnan or elsewhere
I shall have much
pleasure in reading
them.

I beg to forward a
copy of my paper
n. "Restoration", in which
you will see that I
have followed your
suggestion about
Convolute & enclosed;
and which I hope
will interest you.

As Joseph Hooker
is on his way to you
I had great pleasure

in marrying my niece -
Harriet Hooker - to
Prof. Gray, just before
he left for America.

Believe me to be
Dear Sir

Yours very truly

George Husk.

Prof. A. Gray.

Henslow, George. 1846. "Henslow, George undated." *Asa Gray correspondence*
