like form with
shiny green leaves
about 8 to 10 feet
high with few seed
pods very green by
age becomes yellow

549

a tree becoming
scarce because of
the usefulness of the
wood 7 to large crop
of fruit are eaten by
man and animals
are sold in the market
grows even to 20+ ^{feet} high
and from three fourths
to one foot diameter
larger trees are gone

550

Rather scarce
plant but little seen
in flower or fruit
its leaves much re-
sembled those of the
Pernu Tree 8 to 10 feet
high

Prosopis

5-51 Mala Mujer

The bad woman

This species has no white
spots on leaves like
the other has besides I
think does not sting. the
hands as the other kind
flowers white and sweet
centered stems of an old.
plant near base three in-
ches diameter you will
find plants 10 feet high
no domestic animals
willingly go near it

552 Mora.

An attractive tree
widely scattered among
woods also found in
fences and dooryards
as it makes good shade
fruit said to be good to
eat and of a cream
color about 30 feet high
as seen and to near two
feet in diameter.
