Dear Sir

Your letter & Package are  
read. I am very glad to see the  
*Hypocrea Richardsoni*. I do not  
however find any distinct frui-  
tification - It is the same thing  
I found in Potsdam N. York  
on Poplar which was also without  
fruit. If you ever find it perfect  
I should like very much to see it  
*Dickeria globosum* Fr. is also new  
to me. All the others I have al-  
ready - Most of them in Acad.  
Frugi Caroliniani. The others  
from Thunberg & C. I will write  
below a list of some of the things  
I want

<i>Trametes lactineus</i> B.	{	<i>Trux / pityrenus</i> B & C
<i>Mecurialis patellaeformis</i> B & C.		<i>Corticium olivascens</i> B & C
<i>Hydnium diffractum</i> Fr.	{	<del><i>scutellus</i> B &amp; C</del>
<del><i>pusco-atrum</i> Fr.</del>		<i>Lacrymyces</i>
<i>Nidulum</i> P.	{	<i>Chrysosporium</i> B & C
		<i>Geaster fimbriatus</i> B.
		<i>Physarium muscicolum</i> P.

" ochroleuca	B+C	" polyporoides B+C
" Armeniaca	B+C	" parasitans "
" subviciclis	"	" atramentosa "
" Petersii	"	

For any two of the Hypocreas last mentioned  
I will send you two new species  
I have found here - Helvelloia Ephippium  
I should very much like to see and  
will give in exchange for it Artocreas  
Micheneri B+C, a rare & curious fungus

For any of the above you can send I  
will try & satisfy you with spec.  
in return - This is a fine locality  
for fungi & I am finding many  
new things - Can you tell me where  
Curtis's Collection is?

Very truly Yours

I send with this  
a package with the  
Spec. you named  
except Per. nigrescens (?) } J. B. Ellis
