

Sumatra collections, Yates Bartlett & Hamel,  
Rahmat Si Toroes, etc.

Y = Yates  
B = Bartlett  
R. = Rahmat Si Toroes  
H. & R. = Hamel & ~~Rahmat~~ Si Toroes

Oleaceae:

- 777 H. & R. *Linociera pubipaniculata* Merr. n. sp.  
371 R *Jasminum multipetalum* Merr. n. sp.  
1388 Y *Jasminum crassum* Merr. n. sp.  
7591 B *Linociera calophylla* Blume ? ( no good fls), leaves  
narrow for Blume's species  
1811 Y *Jasminum insigne* Blume ( not *crassifolium* Bl.)  
1431 R *Jasminum* sp.; no corollas.  
7232 B *Jasminum* sp. apparently near *maingaya* Clarke; no mature  
fls.  
1815, 1384, 2094 Y *Ligustrum robustum* Blume  
2475 Y *Jasminum* cf. *multiflorum* Andr.

Malpighiaceae:

- R. 1507 *Aspidopteris tomentosa* ( Bl.) Juss. Good fruiting  
material, when received, may show this to be separable;  
the specimen with buds only.  
B. 8725a, Y 1991 *Hiptage bengalensis* ( Linn.) Kurz ( *H. ma-*  
*dablota* Gaertn.)

Onagraceae:

- R. 1093, Y 2536 *Jussiaea peruviana* Linn. ( *J. speciosa* Ridl.!)  
R. 1278 *Jussiaea linifolia* Vahl

Oleaceae:

- B 6988 *Ochlanostachys amentacea* Mast  
B 7638 *Anacalosa frutescens* Blume  
B 8164 *Erythralum scandens* Blume; narrow leaved form

Opiliaceae:

- R 305 *Champereia manillana* ( Blume) Merr. ( *C. griffithii*  
Hook. f.) I can see little or no reason for distin-  
guishing two species here  
R 1319 *Opilia amentacea* Blume, apparently rather than *Cansj-*  
*era*)  
Y 1482 *Opiliaceae* ?; might be *Santalaceae*; fls needed.

Gramineae: ( I have very few numbers from the Bartlett-Rahmat  
collections; here are a few, unnamed in my lot:

- R 263 *Sphaerocaryum pulchellum* ( Roth.) Merr  
H & R. 741 *Pollinia laxa* Nees ?  
H. & R. 743 *Digitaria timorensis* ( Kth.)  
R. 1053 *Panicum luzoniense* Presl  
R. 387 *Panicum patens* L. ( the form often called *P. carinatum*  
Presl)  
B. 6882 *Schizostachyum lumampao* ( Blanco) Merr or very near  
Y. 1121 *Oryza ridleyi* Hook. f.  
H. & R. *Oryza officinalis* Wall. ( *O. latifolia* Hk. f., non  
Desv.)  
T. 180 *Rottboellia* sp

Scrophulariaceae:

- R. 1395, B. 7767 *Torenia flava* Ham.  
R. 196 *Lindernia crustacea* ( L.) F. Muell  
B. 7922 *Lindernia cordifolia* ( Colsm.) Merr. ( *Vandellia*  
*pedunculata* Benth.)  
H. 1147 R. 329, Y 2311 *Limnophila chinensis* ( Osb.) Merr.  
( *L. villosa* Bl.; *L. hirsuta* Ham.)

Sumatra- 2.

- R. 1396 *Adenosma javanicum* (Bl.) Koord  
 B. 7860, 7523, H. & R. 726, Y. 1461 *Buchnera cruciata* Ham.  
 (B. *sumatrana* Miq. is apparently the same).  
 R. 1106, H. 1096 *Artanema angustifolium* Benth.  
 B. 7764 *Adenosma bilabiatum* (Roxb.) Merr.  
 R. 1332, Y. 1230 *Ilysanthes serrata* (Roxb.) O. Ktz.  
 B. 7736, Y. 1224 *Ilysanthes ciliata* (Koen.) O. Ktz.  
 Y. 2172, 2653 *Wightia*, *ottlanderii* Van Steenia, vel aff. (prob  
 in undet or in undet Bignoniaceae).  
 H. 1031 *Picria fel-terrae* Lour. !! (*Curanga amara* Juss.!)  
 A poor scrappy specimen, named by taste; bite it!  
 B. 7724 *Scoparia dulcis* L.

LOGANIACEAE:

- Y. 2587 *Fagraea acuminatissima* Merr.; new to Sumatra.  
 R. 21, 1478, 1075, B. 8702 *Fagraea racemosa* Jack.  
 R. 1346, 1406 *Fagraea teysmannii* Camel.; new to Sumatra.  
 Y. 1583, 2201 (or 2207?), B. 8324, 8041, 7876, 7479 *Fagraea elliptica*  
 Roxb. (*F. speciosa* Bl.)  
 R. 1290 *Strychnos axillaris* Wall.  
 B. 7537, 8044 *Geniostoma arboreum* (Bl.) O. Ktz.

BURMANNIACEAE:

- B. 7926, *Burmannia disticha* Linn.

RUTACEAE:

- B. 7603, R. 277 *Evodia latifolia* DC.  
 B. 8600, sterile; *Citrus aurantium* L. with little doubt.  
 R. 1388, 1388a *Clausena*; not matched; specimens very poor.  
 H. 1539, B. 6463, 8430 *Clausena excavata* Burm. f.  
 Y. 1837, 1344, B. 8419, 8733, 8256, H. 1170 *Micromelum pubescent* Bl.  
 retained by Tanaka as distinct from the older *M.*  
*minutum* (Forst.) Seem.  
 B. 7190, 8451 *Merrillia caloxylon* (Ridl.) Swingle; the genus is new  
 to Sumatra.  
 R. 1531 *Paramignya andamanica* (King) Tanaka; new to Sumatra.  
 B. 8663 *Evodia speciosa* Rchb. f. & Zoll.; new to Sumatra.

ALANGIACEAE:

- B. 8703 *Alangium chinense* (Lour.) Rhed. supsp. *tomentosum* (Bl.)  
 (possibly mixture of labels or numbers, your label gives  
 the preliminary ident. as *Fagraea racemosa* Jack).

CONVOLVULACEAE:

- R. 356 *Jacquemontia tomentella* (Miq.) Hallier f.  
 R. 1330, B. 8159 *Merremia peltata* (L.) Merr.  
 H. 1058 *Ipomoea gracilis* R. Br. (*I. denticulata* Choisy)  
 H. 1098 *Anisaea martinicensis* (Jacq.) Choisy  
 R. 1532 *Merremia gemella* Hallier f.  
 B. 9070 *Merremia hastata* Hallier f.  
 B. 7088, 7600, 6665, Y. 2253 *Erycibe tomentosa* Blume

CELASTRACEAE:

- T. 1492, safely *Celastraceae*, and probably *Lophopetalum*; material  
 very poor.  
 R. 7653, safely *Celastraceae*, and probably *Glyptopetalum*; only very  
 young buds.  
 T. 214, 375 *Microtropis sumatrana* Merrill n.sp.  
 B. 5690, 7510 *Perrottetia alpestris* (Bl.) Loesen. (also 5892 - *Rohmet si Borea*)  
 B. 6864 *Celastrus malayensis* Ridl.

HYDROPHYLLACEAE:

- B. 6563, Y. 2022 (as *Brookea*? *Scroph.*?) is *Wigandia kunthii* Choisy,  
 native of Mexico. Bartlett: Was this cult. or  
 naturalized?

## Campanulaceae:

- R. 61 *Pentaphragma integrifolium* Merr. var. *longipetiolatum* Merr  
n. var.  
B. 7495 *Pentaphragma bartlettii* Merr. n. sp.  
B. 7572, 6737, 6630, Y 2597 *Pentaphragma integrifolium* Merr.  
n. sp.  
B. 8625 *Pratia montana* (Bl.) Hassk  
B. 6513 " " " "  
B. 7497 *Pratia nummularia* (Lam.) Kurz.  
H. & R. 763 *Campanumoea lancifolia* (Roxb.) Merr. (*C. axillaris*  
Oliv.)

## Casuarinaceae:

- B. 8561 *Casuarina equisetifolia* Forst  
B 9051, 7493 *Casuarina sumatrana* Miq.

## Boraginaceae:

- B. 8735 *Tournefortia tetrandra* Bl. (*T. zollingeri* Miq.)

## Caprifoliaceae:

- B. 7735 *Lobelia succulenta* Blume (*L. affinis* Wall.)  
B. 6483 *Viburnum cylindricum* Ham. (*V. coriaceum* Bl.)  
B. 8033 *Viburnum*, apparently near *cylindricum* Ham.; fls needed  
B. 7475, 7440 *Viburnum cylindricum* Ham. var. with small leaves,  
but fls may show it to be specifically distinct  
R 1480, Y 2535, 2524 *Viburnum sambucinum* Bl. var. *tomentorum* ~~K~~  
Hallier f. (*V. sumatranum* Miq.)  
B 8160, R 1345, 340, 218, B 7849, 8071 *Viburnum sambucinum* Bl.  
B 8039, 7478 *Lonicera pulcherrima* Ridl.

## Capparidaceae:

- B. 7826 *Capparis*; indeterminate from the fragmentary, incom-  
plete specimen; no good fls, and method of attachment  
not shown  
R. 1418 *Cleome ciliata* Schum & Thom; native of tropical  
Africa, but also naturalized at Penang and Singapore, but  
not in Ridley's Flora.

## Cruciferae:

- B. 6573 *Cardamine africana* var. *bobornica* (Pers) O. Schulz  
(*C. javanica* (Bl.) Miq.)

## Cucurbitaceae:

- R. 1533 *Gymnopetalum cochinchinense* (Lour.) Kurz.  
R. 1427 *Melothria javanica* (Miq.) Cogn  
B. 7228, Y. 1249 *Melothria gracilipes* Merr. n. sp.  
B 8702a *Bartlettia sumatrana* Merr. n. gen. n. sp.

Compositae: (Here I have included only those numbers where additions  
or corrections are made; where there is no change in the origin-  
al determination, the numbers are not cited)

- B 7661 *Erechtites hieracifolia* Raf.  
H. & R. 751 *Sonchus oleraceus* Linn  
H. & R. *Senecio araneosus* DC. as far as I can tell from the  
old specimen, no flowers and no achenes  
Y 2455 *Senecio korintjiana* Boerl  
B. 7505 *Gynura procumbens* (Lour.) Merr. but with narrow  
leaves and apparently somewhat larger heads than in the  
typical form. Better wait for additional collections  
before attempting to separate this form  
B. 7799, R. 1051, perhaps *Blumea barbata* DC.; the material is  
not ample or satisfactory  
R 1267 *Vernonia cinerea* Less. a robust form  
H. 1143 *Adenostemma lavenia* (L.) O. Ktze  
H. & R. ~~xxx~~ B. 8336 *Anaphalis longifolia* DC  
B. 7430 *Laggera alata* Schulz-Bip  
B. 7868 *Microglossa volubilis* DC  
R. 1333, Y. 1294 *Vernonia javanica* DC. *V. arborea* Ham. is  
a "collective species" probably including several really

## Sumatra 4

## Compositae ( cont.)

- H. 1010, R. 1036 *Eleutheranthera ruderalis* ( Sw.) Schulz-Bip.  
Naturalized from tropical America; occurs also in Java and  
in Singapore, but is not in Ridley's Flora.

## Clethraceae:

- Y 1285, 2348, B. 7890 *Clethra pubifolia* Merr.n.sp.  
Y.1518 *Clethra pulcherrima* Ridl.!( an *C. sumatrana* J.J.Sm.)  
B. 8312 *Clethra sumatrana* J.J.Sm.  
B. 7394 *Clethra longipedicellata* Merr.n.sp.

## Chloranthaceae:

- B. 8275 *Chloranthus officinalis* Blume ( other numbers in this  
genus are correctly named)

## Commelinaceae:

- B 6844 *Pollia*, sp.indet; inadequate material, but probably  
belongs in this genus  
B. 6620, H. & R. 687, Y 1552 *Pollia aclisia* Hassk  
R. 8 *Pollia thyrsiflora* ( Bl. ) Steud  
B. 8414 *Pollia pumila* Hall.f  
H. & R. 757 *Forrestia marginata* Hassk  
B. 7707 *Forrestia irritans* Ridl  
H. 1184 *Forrestia sumatrensis* Ridl  
B. 6612 " "  
H. 1057 *Commelina nudiflora* Linn  
B. 6932 *Aneilema sinicum* Lindl  
R. 1439 *Aneilema malabaricum* ( L.) Merr.  
B. 6563, and probably 7897 ( poor specimen) *Aneilema protensum*  
Wall.  
B" 8592 *Commelina obliqua* Hassk.

## Cyperaceae ( correctly reported in earlier lists not included here)

- B. 8676, 8228, R.27 *Mapania humilis* ( Hassk.) F.-Vill.  
R. 275 *Mapania* sp.; a single detached immature head; insufficient  
B. 6895 *Mapania* sp.; sterile  
R. 102 *Mapania palustris* ( Hassk.) F.-Vill.  
B. 8049 *Fimbristylis* sp.  
R. 255 *Fimbristylis monostachya* Hassk  
H. 1196 *Fimbristylis* sp. indet; too immature.  
B. 7204, R. 19 *Fimbristylis dura* ( Z. ' & M.) Merr. ( *F. asperrima*  
Boeckl.)  
B. 7668 *Fimbristylis* sp.; form of ~~*F. dura*~~ *F. dura* ?  
H. 1133 *Fimbristylis annua* ( All.) R. & S. ( *F. diphylla* Vahl)  
H. 1295 *Fimbristylis globulosa* Kth  
B. 6833 *Pycneis globosus* L. var. *holosericeus* ( Link) Merr.  
R. 382 *Cyperus radiatus* Vahl  
B. 8204 *Cyperus eleusineoides* Kth ?  
H. 1032 " " "  
R 333 B. 8067 *Cyperus uncinatus* Poir  
B. 8214 *Cyperus procerus* Rottb ?  
R. 383 *Torulinium ferax* L.C.Richard  
R. 72, B. 8221 *Cyperus diffusus* Vahl  
B. 8363 *Cladium undulatum* Thw.  
B. 7842, 7509a *Cladium latifolium* Merr. ( *Vincentia malesica*  
Stäpf.), depending on the generic concept  
B. 6426, 7249 *Scleria sumatrensis* Retz  
H. 1126, R 1400, ~~B. 7249~~ *Scleria terrestris* ( Linn.) Fass.  
( *S. elata* Thw.) *B. 7942 Scleria hebecarpa* Nees  
R. 327 B. 6422 *Scirpus mucronatus* Linn  
R. 154 *Mariscus sieberianus* Nees  
B. 7670, R. 271 *Kyllinga*; perhaps form of *K. cylindrica* Nees  
R. 1331 *Lipkocarpa argentea* R.Br  
B 6851 R 20, B 6753, R. 366 *Hypolytrum latifolium* L.C.Rich  
B. 6481, H & R 756 *Carex baccans* Nees  
B. 7791 *Carex rafflesiana* Boott B. 8503 *Gahnia javanica* Z. & M  
July 17, 1932 EDM

## Saxifragaceae:

- B 8610, H. & R. 746, Y 1518 *Dichroa cyanitis* Miq.  
(not *D. febrifuga* Lour.).  
B 7946, 7947 *Hydrangea oblongifolia* Blume

## Solanaceae:

- B. 8215, H. 1242 *Solanum* (*Lycianthes*) *biflorum* Lour.  
var. Bitter, who retains *Lycianthes* as a valid  
genus would probably place this under some other  
species because of the short calyx teeth.  
H. & R. 679 *Solanum* (*Lycianthes*) sp; allied to *biflorum*,  
the material very incomplete.  
H. 1541 *Physalis angulata* Linn.  
B. 8407 *Solanum indicum* Linn., a spineless or nearly  
spineless form.

## Simarubaceae:

- R. 1354, *Picrasma* sp. I think, but only detached young  
fls., no inflorescences, and an incomplete leaf.  
B. 6788 *Picrasma javanica* Blume

## Linaceae:

- B. 6883 *Paucifloria javanica*!  
I can suggest no other family, but the genus  
is quite unknown to me, fls necessary.

## Aristolochiaceae:

- B. 7338, 7331 *Apama corymbosa* Solerader.

## Lycopodiaceae:

- R. 1475 *Lycopodium phlegmaria* Linn.

## Anacardiaceae:

- B. 7599 *Dracontomelum mangiferum* Blume  
B. 8734 *Mangifera foetida* Lour.  
Anac. indet. B. 7065 I do not know the genus and  
cannot place it without fls.; safely Anacardiaceae.

## Amaranthaceae:

- B. 7366, 7663a *Cyathula prostrata* (L.) Bl.; but *Cyathula*  
Lour. is *Achyranthes* Linn.! Cambridge code proposes  
to hold up *Cyathula* Blume, non Lour. for this genus  
B. 6942 *Psilotrichum trichotomum* Blume

## Ericaceae:

- B. 8019, 7991 *Diplycosia bartlettii* Merr.n.sp.  
Y. 2458 *Diplycosia sumatrensis* Merr.n.sp.  
Y 1496, 2003, B 8646 *Rhododendron yatesii* Merr.n.sp.  
B. 7998 *Rhododendron sumatranum* Merr.n.sp.  
B. 8005 *Vaccinium bartlettii* Merr.n.sp.  
Y 2427 *Vaccinium urophyllum* Merr.n.sp.  
Y 2204, 2410 *Rhododendron multicolor* Miq. (not *yatesii*)  
B. 8647 Y. 2462 *Rhododendron retusum* Benn

## Elaeagnaceae: B

- B. 8597, 8368 *Elaeagnus ferruginea* Rich. subsp. *sumatran*  
*ana* Servatzev; also Y 1432 (not *E. latifolia* L.)

## Eriacaulaceae:

- B. 7457, 7883 *Eriocaulon hookerianum* Stapf

## Elaeocarpaceae:

- B. 6868, 6744 *Elaeocarpus griffithii* Wight; small lvs.  
R. 1522 *Elaeocarpus stipularis* Bl. (*E. gambir* Becc.)  
B. 7020 *Elaeocarpus petiolatus* Wall.  
B. 7022 *Elaeocarpus stenophyllus* Merr.n.sp.  
B. 7318 *Elaeocarpus parvifolius* Winkl.

## ERICACEAE:

- B. 8638 *Gaultheria nummularioides* D. Don  
B. 8028 *Gaultheria fragrantissima* Wall.  
B. 8024, Y 1973 *Vaccinium eugenioides* Moore  
B. 8245, 8311, 7145 *Vaccinium littoreum* Miq.

## Sumatra 6

## Nepenthaceae:

- R. 337, B 8405, 7074 *Nepenthes ampullaria* Jack  
 B. 7481, 8348, 7848, Y ~~200~~ 2013 *Nepenthes tobaica* Danser  
 R. 30 *Nepenthes mirabilis* (Lour) Druce ? No pitchers  
 B. 8030 *Nepenthes spectabilis* Danser  
 B. 8921 *Nepenthes pectinata* Danser  
 B. 8032 *Nepenthes rafflesiana* Jack

Liliaceae: ( have not been able to do much with representatives of this family, chiefly because of incomplete specimens)

- B. 8232 *Smilax* sp. no fls  
 B. 7878 *Smilax* sp. sterile  
 B. 7504 *Smilax leucophylla* Blume  
 B. 7892 *Smilax* cf. *laevia* Wall. Sterile  
 B. 6938 *Smilax* sp cf. *indica* A.DC  
 B. 8712 *Smilax ferox* Wall val aff. no fls  
 B. 6539 *Disporum cantoniense* (Lour.) Merr.  
 B. 6383 *Pleomele* sp. a detached leaf only  
 B. & 7050 *Pleomele* sp. no fls  
 B. 8134 *Pleomele*, group of *elliptica* (Thunb) ;sterile

## Ebenaceae:

B. 6996 *Diospyros* sp. almost certainly; no fls

R. 105, 1343 *Diospyros wallichii* K. & G ?

Asclepiadaceae: ( I have very little working knowledge of this difficult family; following are tentative dets.)

B. 6950 *Dischidia* = Yates 1681, no fls

B. 7577 *Dischidia* sp. no fls

R. 245 *Hoya* sp

R. 60 *Hoya* ???

H. & R. 682 *Hoya rhodostela* Ridl

B. 8694 *Hoya coronaria* Blume

B. 7123 *Gymnema* ( not *Ehretia*)

B. 7021 *Dischidia hirsuta* Decne

## Loranthaceae:

H. 1352 *Loranthus* sp. inadequate

R. 123 *Loxanthera speciosa* Blume

H. 1351 *Loranthus pentandrus* Linn.

Y. *Dendrophthoe flosculosa* Danser

Y. 1263 bis (or a) *Elytranthe cochinchinensis* (Lour.)

Y. 1385 *Loranthus incarnatus* Jack

Y. 1582 *Loranthus productus* King.

Y. 1581 *Loranthus productus* King.

## Anonaceae:

B. 7121 *Artabotrys suaveolens* Blume

B. 7071 *Artabotrys sumatranus* Miq ? fls needed

Y. 1908 *Cyathostemma hookeri* King (not *Pseuduvaria*)

R. 1347 *Dasymaschalon blumea* Finet & Gagnep.

R. 1377 *Fissistigma fulgens* (Wall.) Merr.

B. 7303 *Fisstigma manubriatum* (Wall.) Merr.

B. 7658 *Goniothalamus macrochyllus* Hk. f. & Th.

R. 1341 *Goniothalamus* sp.; only 1 fl.; nothing for study

B. 8111 *Oxymitra glauca* Hk. f. & Th.

B. 8192 *Oxymitra* sp. with stem galls, no fls or fruits

B. 7333 *Oxymitra excisa* Miq. prob. fls needed.

R. 1315 *Pseuduvaria reticulata* (Bl.) Miq.

R 323 *Polyalthia glauca* (Hassk.) Boerl (P. sumatran (Miq.) Kurz.)

R. 1313 *Phaeanthus sumatrabus* Miq. ? fls needed.

B. 8294 *Stechelorcearpus nitidus* King ? fls needed.

R. 1383 *Dasymaschalon* (probably); my specimen has calyces only; corolla essential.

## Anonaceae:

- R~~X~~ 1288 Uvaria ( probably); only one very immature fl.  
 Y 1951, 1753 Polyalthia stenopetala Finet & Gagnep  
 B. 7319 Polyalthia bullata King Ridl.  
 R. 362, B 6866, 7286 Polyalthia desmantha ( Hk.f. & Th.)  
 Y. 1719 Pyramidanthe prismatica ( Hk.f. & Th.) Merr  
 ( not Uvaria lobbiana)  
 B. 8725 Uvaria ptychocalyx Miq.  
 B. 8413 Uvaria purpurea Bl.  
 B. 6873 Uvaria lobbiana Hk.f. & Th., as far as I can tell  
 in absence of flowers  
 Y. 2147, 2562 Xylophia ferruginea Hk.f. & Th.  
 R. 1288, 1449 Miliusia sp. as far as I can determine in  
 the absence of flowers  
 B. 7018 Drepananthus pruniferus Maingay

## Apocynaceae:

- R. 1428 Chilocarpus ( no fls or fruits)  
 H. & R. 713 Alyxia forbesii King.  
 B. 6722 Alyxia odorata Wall.  
 B. 7291 Leuconotis sp. no mature fls.  
 R. 1506 Willugbeia sp. ( no mature fls.)  
 Y 1475 Parameria barbata ( Bl.) K.Schum  
 B. 8690 Tabernaemontana dichotoma Roxb.  
 Y 1787 Tabernaemontana crispa Roxb ?

 B 6773 *Ficus stolonifera* King, if the infructescences were  
 prostrate on ground, not hanging from the branches  
 Y 1946 *Ficus obtusa* Hassk; Y 2274 *Ficus lacor* Ham. var.

Sumatra- 13

(*Rahmat si Boera*: 5810 - *Pericampylus glaucus* (Lamk) Merr)

Monimiaceae:

B 7095, R 253 *Kibara chartacea* Blume

Menispermaceae:

B 7664 *Limacia* sp. I think, but buds too young to be sure

R 1505 *Limacia velutina* (Wall.) Miers, var.; leaves rounded  
7 hence not typical

R 1495, 6847 *Cycbea laxiflora* Miers ? One with very immature  
re staminate buds, other with immature fruits, no fls.

R 34, B 7015 *Fibraurea chloroleuca* Miers

Meliaceae:

B 7327 *Dysoxylum cauliflorum* Hiern

R 1408 *Aphanamixis rohituka* (Roxb.) W. & A

B 6865 *Aphanamixis* sp.; fls needed

B 8727 *Aphanamixis grandifolia* Blume

Y 2386 *Chisochiton sumatranus* Bak.f.

R 302 *Chisochiton lasiogynus* Boerl. & Koord

Pandanaceae: Most of the material submitted consists of leaf-  
specimens only; identification is impossible without  
fruits.

B 8057, R.39 *Pandanus* (if erect) no notes, ~~no~~ leaves only  
prob. = Yated 1653

B 7178 leaf only; looks like *Pandanus tectorius* Soland.

R 372 *Pandanus* in fl.; fruits essential

B 7611 *Pandanus* I suppose, surely so if erect; leaf only

B 8043 *Pandanus*; leaf only

B. 6545 *Freycinetia* (probably; surely so if scandent)  
leaves only, no notes

B. 8632 *Pandanus*; group of *P. immersus* Ridl.

Passifloraceae:

R. 51 *Passiflora*; possibly undescribed, apparently allied to  
*P. octandra* Gagnep; specimen very poor

H 1155 *Passiflora foetida* Linn

R. 1397 *Adenia quintuplinervia* (Miq.) Hall.f.

Y 1891 *Adenia macrophylla* (Bl.) Koord

Y 1427 " " " "

B 6385 " " " " (not "grandifolia")

Pinaceae:

8562 *Callitris* sp.; I have no working knowledge of this  
Australian genus.

Piperaceae: No changes in identifications previously reported  
Few additions, as follows:

B. 8570, 8398 *Piper philodendron* Ridl. ex descr.

B 6453 *Piper* sp. juvenile ! without its mature character  
leaves ; any further det. would be merely a guess

Phytolaccaceae:

B. 7006, 8334 *Phytolacca icosandra* Linn !!! Was this cult.  
or wild ? It is strictly an American species and hence  
must be an introduced one in Sumatra. It is recorded  
from no parts of the Old World.

N.B.

Rubiaceae:

R. 1291 *Borreria latifolia* (Aubl.) K.S. Schum. Introd. from  
trop. america, but recorded from no parts of the Old World;  
I have it also from Singapore !! Not in Ridley

H. 1080, 1011 B 6458 *Borreria laevis* (Lam.) Griseb. Like  
the preceding, yet not reported from the Old World. I have  
recently collected specimens from Philippines ! New Guinea !  
Singapore ! New Britain ! and Samoa ! Not in Ridley

B. ~~6890~~ 6980 *Nauclea* (*Sarcocephalus*) *junghuhnii* (Miq.) Merr.

Y. 1293 *Neonauclea cyrtopoda* (Miq.) Merr. (not obtusa)

 H. & H. 698 *Mycetia angustifolia* Ridl  
 R. 674 *Mycetia angustifolia* Ridl  
 Y. 1367 B. 7647, 7620 *Tricalysia* (*Diplospora*) *singularis*  
 (North.) Merr.

Rubiaceae of uncertain generic position because of inadequate material. B. 8179 (looks like *Psychotria* in all but its axillary inflorescences) B. 7157 (4-celled fruits, immature); B6761 no mature fls.

Y. 2501 *Wendlandia ovata* Merr.n.sp. (prob. in herb U.C. as Apocynaceae indet.)

In this exceedingly difficult family anyone is handicapped by inadequate field notes. Many of the specimens have no notes; others do not indicate whether tree, shrub, or vine is represented and sometimes one cannot determine from a herbarium specimen whether or not a scandent or erect plant is represented. The numerous notes in some character unknown to me are all "Greek" as far as supplying any definite information as to the plant. These statements, of course, apply to other groups than Rubiaceae as well; but in these very large families good notes often supply most important clues. EDM. At the end of a long hard day !!!!!

## Sumatra 16, continued:

## Myristidaceae:

- 7299 B, 7052 B *Gymnacranthera forbesii* (King) Warb  
 B 7329 *Knema intermedia* Warb.  
 B 7110 Y 1610 *Horsfieldia irya* (Gaertn.) Warb ? staminate  
 infl. rather too long for this species, & leaves large  
 B. 6990 7304 6867 *Horsfieldia amygdalina* (Wahl.) Warb  
 B 7151 Y 2184 *Horsfieldia bivalvis* (Hk.f.) Merr.  
 B. 7300, 6991 *Horsfieldia glabra* (Bl.) Warb. ? but cf.  
 H. *iryia* Warb--material insufficient  
 B. 8283 *Myristica fragrans* Houtt  
 B. 7177 *Myristica*, apparently same as Yates 2123, material  
 insufficient

## Guttiferae:

impossible to make any further detts. of the few species, mostly *Garcinias* in fruit, except by comparison, and I cannot match any of them here.

## Myrsinaceae:

- H & H. 761 *Ardisia reclinata* Scheff ? fls needed.  
 B 8230 *Ardisia dolichosepala* Merr.

 The more I try to use Mez's monograph, in Pflanzenreich, the more I cuss, because it wont work. I conclude that somebody must do it all over again !!!!!

## Araceae:

- R. 120, 177 Anadendron? If so, a very distinct new species, but I am afraid of Raphidophora-Epipremnum-Scindapsus etc. There are no spathes on my material!  
 B. 8450 Pothos beccarianus Engl. without doubt, but merely the juvenile leaf-form; see fig. in Engl. Pflr. 24: 44 fig. 17 (on p. 43)  
 B. 7689 Schizmatoglottis sp.; no complete ~~spathes~~ spathes.  
 R. 119 Schizmatoglottis sp.; inadequate specimen  
 B. 6985 Scindapsus hederaceus Schott  
 Y. 1457 (and 1691?) Raphidophora wrayi Hook.f.  
 Y. 1537 Raphidophora korthalsii Schott.  
 B. 7220 Raphidophora korthalsii Schott?; only parts of a flea, no fls or fruits.  
 Y. 1764, 1333 Pothos macrophyllus De Vriese (not P. macrocephalus ~~Schott~~ Scort.)  
 B. 6440, H & R 1311 Lasia spinosa (Linn.) Thwaites  
 B. 8307 Homalomena I suppose; the specimen is badly dried and badly broken.  
 R. 104 Homalomena sp.  
 R. 14 Homalomena longipes Merr.n.sp.  
 B. 8426 Homalomena; cf. sagittifolia Jungh; specimen very fragmentary  
 R. 224, B. 8467 Homalomena pygmaea (Hassk.) Engl  
 B. 8295 Homalomena humilis (Jack) Hk.f.  
 B. 7683, 6643 Homalomena angustifolia (Jack) Hk.f.  
 B. 8222, Y. 1265 Colocasia indica Hassk. (hardly Alocasia)  
 B. 7005 Anadendron affine Schott  
 Y. 1228 Aglaonema marantifolium Bl  
 R. 9, 173 Aglaonema oblongifolium Schott.
- Araliaceae:  
 R. 1287, B. 8240 (sterile!!!) Schefflera bartlettii Merr. n.sp.  
 B. 8267 Schefflera sumatrana Merr.n.sp. I venture this because the l-foliolate character is unusual; this in spite of the fragmentary broken inflorescence.  
 Y. 1970 Schefflera multifoliolata Merr.n.sp. (not heterophylla)

## Sumatra- 18

- Y 1963, 1447, B 7951 Schefflera scandens ( Blume) Koord.  
 B 7548 (large bullate, many nerved lvs.) B 7292 R 144,  
~~x39~~ 1490, H 1140 Schefflera tomentosa ( Blume) Harms  
 comes well within range of variation of Malay Penin. form,  
 but like the latter is more tomentose than the Javan type  
 B 8332 Schefflera venulosa ( W. & A.) Harms  
 B 7189 H 1181 ( both with mere fragments of infl.) Y 1370  
 Schefflera yatesii Merr. n. sp.  
 Y 2251 Schefflera rigida ( Bl.) Harms ?  
 Y 1721 2543 Schefflera elliptica (Miq.) Harms (vix venulosa)  
 B 6958 Schefflera; very characteristic, not placed, but alto-  
 gether too young  
 B 8065, 7230 Arthropodium ovalifolium Miq  
 R. 38 Aralia beccarii Ridl; but probably also the Sumatra  
 form referred by Miquel to A. dasycphylla Miq.  
 Y 1474 B 6492a Brassaiopsis glomerulata ( Bl.) O.Ktz.  
 H 1175 Trevesia burckii Boerl. ( not buckii)

## Begoniaceae:

- B. 8479, 6621, 8515 Begonia beccariana Ridl.  
 ( am unable to carry determinations of the few other numbers  
 beyond the genus. In every case something is lacking, either  
 fruits or male or female fls, and one needs " all he can  
 get" to do anything with Begonia !

## Burseraceae:

- Not able to do much with these. Dr. Lam has been working on  
 the family for some years but has published little. He has  
 not been very "stable" in his recognition of genera.  
 7345 B Santiria ( i.e. Hemisantiria; but I believe that  
 Lam has another generic name for this group now) Fls.  
 needed. Same as Krukoff 208 ( sterile)  
 B 7048 Canarium cf. denticulatum Bl.; but might be a San-  
 tiria--- the fruit is too young.  
 B 6872 Santiria sp. ( i.e. Hemisantiria I suppose)

## Dichapetalaceae:

- R 1516 1409 Dichapetalum timorense ( DC.) Engl. 1409 is  
 remarkable similar to the typical form; isotype from  
 Timor in herb. N.Y.! EDM

## Dioscoreaceae:

- Y 2055 Dioscorea daunea Prain & Burkill (det Burkill)

## Olacaceae:

- B 7317 Ochanostachys amentacea Mast. sterile! ( in prelim  
 list as " Dipt."

## Dilleniaceae:

- B 6903 Wormia pulchella Jack  
 B 8718 Wormia oblonga Wall. Wormia is sufficiently dis-  
 tinct from Dillenia, but often it is difficult to  
 separate the two when fls only are available.  
 B 7514, 6591, 7784 Saurauia vulcani Korth  
 B 6400 R 189, H 1132, Y 1426 Saurauia nudiflora DC  
 B 7444 8656, 7910 H & R 721 Saurauia roseata Ridl  
 Y 2325 Saurauia leucophloeia Korth ?

Aquifoliaceae: I wasted hours trying to solve the difficulties of Loesener's "monumental" monograph of this family, but can only conclude that the result of his work is "confusion worse confounded!" Maybe with supplementary collections I can do better, for often one needs perfect and staminate fls and fruits.

- B. 8333 X *Ilex spicata* Blume
- B. 6504 *Ilex bartlettii* Merr.n.sp. (ad interim) I may hold this up pending additional collectons; fruits only
- B. 9016 *Ilex havilandii* Loesener
- B 7395, Y 2301, 1584 *Ilex grandifolia* Merr.n.sp.
- B 8003 *Ilex* sp.

Gesneriaceae: Another group in which I am not at all "at home" outside of the Philippines? Ridley's work has complicated the group very badly as to the Malaysian species.

- B. 8615 *Didymocarpus* ~~e~~ Yates 2628; *D. albina* Ridl.
- B 7404, Y 2296 *Didymocarpus horsfieldii* O.Ktz. or near
- B 8520 *Didymocarpus* sp. group of *D. albina* Ridl.
- B. 6505 *Didymocarpus* sp
- B 6750 *Didymocarpus platypus* Clarke var. *sumatranus* Ridl.
- B 7363 *Didymocarpus crinita* Wall.
- B 6971 *Trichosporum* sp. no fls.
- B 8695 *Trichosporum* sp.
- B 7760 *Trichosporum* sp.
- B. 8503 H & R. 710 *Trichosporum* sp.
- B 7955 ~~Trichosporum~~ *Cyrtandra* sp. group of *oblongifolia* Benth. & Hk.f. no fls
- B 6780 *Cyrtandra* sp. no fls; apparently group of *C. picta*.
- B 7690 *Cyrtandra* sp. no fls
- R 103 B 6716 *Cyrtandra rosea* Ridl
- H & R 691 Y 1473 *Cyrtandra pauciflora* Ridl
- B 8602 *Cyrtandra pandurata* Ridl
- B 8613 *Cyrtandra* ?? (no fls or fruits; might be *Scroph.* or even *La biate*.)
- B 8688 8174 8206 *Cyrtandra* sp
- B 8612 *Cyrtandra* sp: This family is one of those "impossible" groups unless one can get at authentic material of most of the species!

Lauraceae: Another bad group, bad even when one has staminate, pistillate fls and fruits. The oriental genera are rather badly defined, and there seems to be little agreement as to generic limits in the *Litsea* group. I have here numerous authentic specimens, many fragments, in the Meisner herbarium, but still I am unable to carry some of the identifications beyond the probable genus.

 ( not *M. dispar*)  
 R 334 *Mallotus macrostachys* Muell  
 R 167, 334 " " "  
 B 8286 *Mallotus repandus* Muell  
 B 7656 *Macaranga bartlettii* Merr.n.sp.  
 R. 1235 *Macaranga divergens* Muell.  
 Y 2602 *Macaranga gigantea* ( Rchb.f. & Zoll.) Muell.  
 B 8075 *Macaranga triloba* Muell  
 R 192 *Macaranga denticulata* Muell  
 B 6892 *Macaranga javanica* Muell.  
 B 6462 *Homalanthus populneus* Pax.  
 R 1527, 29, B 7258 ( sterile; or does your specimen by chance  
 have female fls or fruits ?) *Botryophora kingii* Hook.f.!  
 A wonderfully interesting find; two collections recorded,  
 and so far only male fls known Am sure this belongs  
 in tribe with *Macaranga-Mallotus* etc., but Pax and Hoff-  
 mann do not include it, and Engl. & Prantl place the genus  
 among those of uncertain status. I never saw this before,  
 but worked it out by the rather tedious process of "generic  
~~R 1435 *Sebastiania chaemala* Muell.~~ elimination"  
 R. 1435 *Sebastiania chaemala* Muell.  
 H 1240 Y 1739 B 7613 R 59 1514, 1212, 1225 *Trigonostemon*  
*sumatranus* Pax & Hoffm. But I rather doubt the species  
 being distinct from the Mal.Penin T *malaccanua* Muell.,  
 while the Yunnan T. *thyrsoides* Stapf is very very close.  
 R 1044 B 6459 *Sauropus androgynus* ( Linn.) Merr.

 H & R 776 R 1109 *Phyllanthus urinaria* Linn  
 B 8142 *Phyllanthus niruri* Linn  
 B 8293 *Richeriella* sp ? but if so the generic limits  
 will have to be extended somewhat. So far monotypic,  
 (Palawan, Philippines), but I have specimens of another  
 species from Indo-China collected by C.Kuntze, and I found  
 a specimen from the Malay Peninsula at Kew, representing  
 another species. Female fls or fruits, Or both, needed  
 R 1389 prob Euphorbiaceae, staminate only, no good fls  
 ( only young buds, open fls fallen) staminate needed  
 B 7089 Euphorbiaceae ??? fls too young to be sure.  
 Orchidaceae: I'm no orchid specialist, but the more I compare  
 specimens the more I am inclined to the belief that among  
 orchidologists a species is merely "one plant perched  
 on another one somewhere in the tropics" to paraphrase one  
 of Gleason's definitions. However, I am pretty confident that  
 my determinations, as far as I have been able to carry them,  
 are reasonably correct !!!

 Polyalthia et al, Anonaceae  
 B 7320 indet; no fls or fruits Suggests Cnestis, but "big  
 tree" forbids

-----

This gives all numbers I have here, other than those that were named, as far as I can name them, in the preliminary lists. In the not distant future you will receive a list of names of the Washington "singles". When you shall have entered all names on your ~~list~~ numerical list, and on the specimens, I suggest that where there are discrepancies that you send the sheets to me. Doubtless, I being my own typist in preparing these lists, I have sometimes hit the wrong number. Any numbers that you may have in duplicate would be gratefully received here ~~xxx~~ especially ferns named by Copeland, of which there are none in N&Y., and the "lost numbers" of the last Rahmat Si Toroos collection. Now that I have worked through this lot, and thereby gained a much better working knowledge of the Sumatran flora, I am sure that I can promptly name the recent Rahmat Si Toroos collection with little delay. When you make up the study set I wish that you would send along any notes that ~~it~~ may be available, ---even native names frequently suggest relationships--- and make the study set as complete as the material will permit.

Oct 17, 1932
