My Dear Dr. Watson:

I find that the sheets of Flora N.A. in our garret are too incomplete for any use. There are in the neighborhood of 100 copies of volume ii. however.

Very Truly Yours
N. L. Britton

Will you buy a set of Bang's Bolivian Plants? He is collecting for us down there, and sending up a good many things not brought by Dr. Rusby. You had a very incomplete set of Rusby's. I have 140 species now ready for distribution - \$14.75 - and there will be more after a while. Morongo's plunder comes through in good order but we haven't done much with it yet. I suppose

you will want a set of these.
Cant tell yet how many
species he will get; so far
he has sent some 750, I think.

The Northrops have gone to
Bahama with the idea of
dragging home all they can
get from those islands,
planning to make ten sets.
Do you want one of them?
