

Pardon me for bothering you
about the light press for
field collecting. It is so
long since I have done
any thing of the kind, that
I thought I would like
some expert advice!
As your advice put me on
this cotton in the life of
the Cypripedium when
you press it?

My love to the good lady
who belongs to you!
Yrs. sincerely. Emily H. Terry.

May 31. 1915

103 SOUTH STREET
NORTHAMPTON, MASS.

My dear Mr. Drake -

I certainly thank you
very much for your letter
telling me about the Bureau.
I am so glad to be
the one to introduce it to you.
That is, to give you the first
view of it - His wonderful
New York is Rapoport I have
one sketch, in a letter by me,
like the one I sent you -
I want to ask you about
what you consider the best

sort of apparatus for carrying
out for collecting - All the
the slabs with papers between
as good as heavy cardboard,
I have had various things
but have nothing now - I'll
come & take my boy for bringing
in the plants that I want to keep
fresh. but for now on that I
want to pass at once, isn't it
better to have the light pen-
cils? I have not the address
of the Atlantic Supply Co, but
I think it is in Rhode -
the Cornucopia near me here,
are perfectly glorious now -
just before they are ready

to gather - the rusty work is to
spraw and peaching - I want my
friend Mr. Brown to pass
some for me, as they will be
past their prime when I get
them - (You have found
the address - in Harvard.)
I would like to have you
go with me for hunting -
I find it's hard to see as
well as formerly - I suppose
you will find new and
interesting plants in the brown-
don Dr. Brown do any col-
lecting now - a - days? He has
his return from return work
in that direction?

Terry, Emily Hitchcock. 1915. "Terry, Emily Hitchcock May 31, 1915." *Walter Deane correspondence*
