

Ellsworth, Maine -  
Sept. 5 - 1901

My Dear Mr. Collins -

As I write the address for this letter I am struck by the fact that you live on Hope St. in the city of Providence - What a favored individual! How serene and untroubled your life must be.

One of the outlying districts of Ellsworth is known as Happytown, and it is a "place" where it seems always afternoon - But Hope St. sounds very inspiring, and I shall anticipate that great things will be accomplished by the dwellers there.

I am writing to thank you for the reprint of the paper on Katahdin mosses. It is very interesting - What an enjoyable trip you must have had!

I was very sorry not to be at the Josselyn meeting this year, but I have had very minute accounts of it

from both Miss Furbish & Miss  
Mansfield who consider that it was  
profitable in spite of the heat.

I have not been able to get in any  
botanical work this summer at all  
except some little that has come to me  
I have not been out at all.

I wrote to Prof. Lane just before the  
meeting that I thought I ought  
to be removed from the committee  
on Bryophytes as I have done ~~no~~ work  
there and some one who would be  
helpful should be assigned to the place.

I was rather surprised that my  
suggestion seems not to have been  
acted upon.

I am going to enclose a few plants  
which I gathered a week ago from a  
marshy place just above high water  
mark at the bay side. The bay is salt  
water. I was interested in them but can  
tell nothing about them.

Very truly yours.

Mary A. Clark.
