

Prof. J. Franklin Collins

Dear Sir:-

Mrs. Mary L. Stevens of
Brookline has suggested that I
ask you to determine the enclosed
moss. The leaf is not unlike *Cath-
arina angustata*, but the costa
is like that of *Polytrichum com-
mune*, and it has an awn like
P. piliferum. Mrs. Stevens has
just spent ten days with Mr.
Dunkham and me at Middle
Dam, Me. The mosses were most

interesting them. We found over
ninety different kinds, but have
not yet been able to determine all
of the Hymenoptera.

Trusting I have not asked
for what a favor I am.

Yours truly

Elizabeth M. Dunkham.

Auburndale, Oct. 4.
