

206 Widders Road  
Waban, Mass.

November 14.

Dear Mr. Collins

I cannot truthfully say that I am sorry that the *Polytrichums* are bothering you, for bothersome things are always the most interesting ones. But I am very grateful for all the time you give them.

I know exactly where I found the small plants and I think I can find the taller one again although I thought it was *P. commune*.

and did not pay particular attention  
to the locality. I did not find  
any fruited specimens. I have more  
of the material collected this fall if  
you care for more, and will collect  
the same things again next fall  
if you wish older plants.

Sincerely yours  
Elizabeth W. Dunkham
