

206 Winder Road,  
Waban, Mass.

January 11

1917

Dear Mr. Curtis,

Are you interested in Polytrichums  
that come from so far away as North  
Greenland? I'm sending you a set  
from some mosses that were sent to  
Miss Kendall of Holden. She exhibited  
these specimens in big naturally  
dried "hunks"; at the New Eng. meet-  
ing and then turned them over to  
me to distribute as I pleased. Out  
of nineteen species, nine that I'm

ing time at the moss meeting in New York. I co-  
with you might have been with us. Mr. Cham-  
berlain should feel gratified that the meeting  
was such a success. Dr. Bent pronounced it  
the best he had ever attended.

Thinking you will not make it a burden to  
examine these mosses, and wishing you a  
happy Christmas New Year I am

sending you an *Polytrichum*, &  
else have *Polytrichum* mixed with  
some other mosses. Nos. 4, 5, 6, 7, and  
possibly 8 and 12 I think are the  
same, but as they came in separate  
pieces I have not mixed them. I  
have examined these and am not  
of they are not *P. hyperboreum*. I  
used Mr. Gray's book for descriptions  
as I had nothing better. The long  
growth in Nos. 1, 2, and 3 I am not  
so sure about. It is interesting to  
see how compact the growth is in  
all these mosses — as if they had to  
cuddle together to keep warm.

We all had such an interest.

Very sincerely yours

Elizabeth M. Dunham

(Mrs. Maria C. Dunham)

Dunham, Elizabeth Marie. 1917. "Dunham, Elizabeth M. Jan. 11, [1917]." *James Franklin Collins correspondence*
