

Amesbury Nov 6 1901

My Dear Mr Collins

As you
said in your letter rec. yesterday
it was indeed interesting to run across
so uncommon a moss as Schistostega
osmundacea in looking over my
herbarium tonight I find I have
the same thing collected by
Mrs Britton in the Adirondacks
at a much higher elevation however.
I enclose two other mosses which
are interesting also, Ephemerum serratum
is no doubt common but comparative
ly few people ever find it owing
to its minuteness.

The form of Hypnum fluitans
is surely odd as you will see
that the lower two thirds
of each plant are like the type,
while the upper third is more
like H. stramineum, at any rate
the top and bottom of each plant
are totally different in all their
characters. Are you interested in
Hepatics I have found a good
many species this fall that are
new to me
Yours Truly

N.B.

Could you furnish
me with Renauld's
address, How could I
insure an answer from him,

J. W. Huntington

Amesbury

Mass.

Yours Truly J. W. H.

Huntington, John Warren. 1901. "Huntington, John W. Nov. 6, 1901." *James Franklin Collins correspondence*
