

GEOLOGICAL SURVEY OF CANADA,

George M. Dawson, C.M.G., LL.D., F.R.S.,

DEPUTY HEAD AND DIRECTOR,

MUSEUM AND OFFICES, SUSSEX STREET,

OTTAWA, Jan. 31<sup>st</sup> 1901.

Dear Dr. Collins

The specimens came safely. I am glad you have asked for authentic specimens from Kindberg.

You will notice Dr. Best's Revision of Lectea, Pseudolecta and Heterocladium well I am, more than, satisfied he is right and hence any specimens of those genera, amongst the mosses, received from me by the University must be corrected if necessary. As soon as you desire I will send you authentic bits of his species. He has returned all my specimens with his notes attached.

Gradually the various genera are being worked up and the new species consolidated.

I send a few (36) more mosses which will bring the whole up to 942. I enclose the bill for this amount. Towards spring I may have 50 additional species to be added if you care to get them.

Very truly yours  
John Dawson
