My dear Mr Collins:--

Your note rec. Please take your time, after your col. year is done will be time for me now that I know it. I shall have Dr. G's mosses to mount later as he is too busy now. I hope you will be with us and do whatever needs to be done at the last.

In regard to the date at which it is advisable to begin ones list, my idea is to have a representative list of work done. If your list is a long one take from it the more interesting species and let the rest go. For most of the members their work covers only a year or so but those who have been students longer have a correspondingly long ^{or lists} one, they vary from twenty sp. to 128 I believe is the most so far in. So just make out as good a showing for yourself as you can and I shall be pleased. As an officer I am particularly anxious to have your work appear. *by list & also Herb. specimens*

I am hoping to see Mrs Britton soon and have a talk as yet it has all been done by letter I hope for a good meeting.

Cordially yours,

May 15th. 1900.

Annie Morrill Smith.
