

B. L. ROBINSON,  
Prof. Syst. Bot. and Curator  
M. L. FERNALD, Assistant Professor  
MARY A. DAY, Librarian

CAMBRIDGE, MASSACHUSETTS, U. S. A.

Sept. 2, 1913

Dear Mr. Weatherly:

It will begin to have the series of Westerly plants for the Club Herbarium and I will have a Club label printed. Soon along with some others which will be needed.

F. W. Hummerell, Bayard Long & I spent three days on Block Island and brought back 400+ things, more than 100 of them new to the island lists of Bailey & Collins & of Hallick. There was much interesting country we did not have time for & we shall go again later. The island, 11 square miles, has 165 mapped ponds and more than that number of excavated holes. There were numerous things new to the general region: Najas guadalupensis, Alnus noveboracensis (Britton's extinct thing of Long Island), Baccharis cylindrica, var. scabra, Castalia adnata, var. gigantea which has acuminate and distinctly carinate sepals!, Rhus Toxicodendron with densely pubescent fruit,

Long & I are making occasional trips into Plymouth County and are getting some good extensions northward, though little that is new to the state flora.

Hope we shall see you in Cambridge frequently this season -

Sincerely yours,

M. L. Fernald.

Fernald, Merritt Lyndon. 1913. "Fernald, Merritt Lyndon Sept. 2, 1913 [Fernald to C.A. Weatherby]." *Merritt Lyndon Fernald correspondence*
