

L. G. Pringle

Charlotte, Vermont.

Sept., 21, 1878.

Prof. Asa Gray,

My Dear Sir,

In a little package by the same mail with this I send you a few plants collected in Vermont this year. I beg you to note a *Carex* near *C. canescens* but not in your Manual. The specimens are from a low wood near the outlet of L. Champlain on the Canadian side, but I found later the same plant on the Vermont side of the line in Alburgh. Specimens gathered July, 20.

Then there are two species of *Epipactis*; No. 1 I found July 18 on the west shore of Knight Island, (Vt.) in Lake Champlain and have since found the same

in various places along the Lake. I
supposed I had got *E. palustris*, *L. until*
I reached home and referred to the
figure of that species in Hooker's British
Ferns. The plate represents another plant
which I collected July 24 on the Rich-
elieu River in Canada and have, also,
found since in Vermont on the shore
of L. Champlain. I send it under
No. 2. Because this last was clearly inter-
mediate between the first and *L. limosum*
L., I was saying I had found *E. littoralis*,
Kuhlenia. Will you be good enough to
set me right? I have represented on the
enveloping paper sections of the stems as they
appeared before drying.

Expresses ruins draw me back from
northern Maine; and these two or three things
are all I have to show in the way of collecting
on the M. S. & Co. for a month's cruise.

Yours sincerely,
L. G. Pringle.

Pringle, Cyrus G. 1878. "Pringle, Cyrus Guernsey Sept. 21, 1878 [Pringle to A. Gray]." *Cyrus Guernsey Pringle letters to Asa Gray*
