

Charlotte, Vermont.

30th, Oct., 1883.

Dear Dr. Gray:

I am quite unable to say what Aster I sent you from my collection of 1882 under No. 249, unless it was the one from the "Cliffs of Castle Lake, Sept., 5th." You said of No. 249, "Probably the same as 222." Now No. 222 came from Lake Co., Cal., Aug., 26, and you believed it might be A. occidentalis, Nutt. The Castle Lake plant has (in my spec.) leaves scarcely 2" wide.

No. 12 came from Napa Junction (which is on the borders of the salt-marshes between Vallejo and Napa,) Oct., 4th; and resembles No. 222.

The Aster from Summit Valley,

Sept., 86th, 1883, was No. 300, and much  
like No. 11 of 1881 from Mts. about the  
head-waters of the Sacramento.

Will you kindly tell me  
if the odd specimens are glued  
to sheets of different size from  
ours, so there would be difficulty  
in incorporating them into my  
herbarium. Sometimes I feel  
that perhaps I should let alone  
foreign plants, and do all the  
better by American.

I wish I might advise with  
you an hour. Some of my friends  
are trying to dissuade me from  
following longer the life of a  
collector; but I suppose it is  
as worthy a work as I can do.  
My heart is still set upon it.  
Yours faithfully,  
C. G. Pringle.
