

Charlotte, Vermont.

14, Nov., 1883.

Dear Dr. Gray:

I am grateful to you for the attention you have given to the question of my future work, and glad to know that I shall please you by keeping at my collecting. I am sure I shall never be content to abandon it now. I know very well how laborious is the work, if thoroughly and conscientiously performed; but I do not mind hard work, while my strength is sufficient, and I have less reason than most people to shrink from the peril incident to the border.

I hope to be able to pay my way by the sale of specimens of my previous

collection I might have disposed
of some thirty sets (instead of twenty
or twenty-five,) if I had made so
many. If my patrons give assurance
of continued support, I shall ma-
ture my plans for another journey,
— for me more at least.

I wish I knew how to obtain
favors from the railroads of the
Southwest, such as are enjoyed by
other collectors; for the expenses of
living and traveling there are
enormous.

I am glad to learn that the
specimens of the road Herd. are not
blued down; for I do want the
portion you have designed for me;
only, if I should not collect
several years, how should I pay
for them? I should help assort the
specimens, but it will be difficult
for me to leave home at present.

The prevalence of yellow fever
along the western coast of Mexico
may prevent my setting out as
early in the new year as I had
hoped to do. This enforced stay at
home, however, gives me an opportunity
to study Spanish, and make other
preparations for work.

Yours faithfully,

L. G. Pringle.
