

Tucson, Arizona,  
18. June, 1884.

Dear Dr. Gray,

Should you ever  
be sending the names of the plants  
which I forwarded a few days  
ago, please <sup>address</sup> me here; I think it-  
best not to move from this base,  
until I have quite finished my  
work for Mr. Sargent; and that  
takes me soon into the Huachuca  
Mts. south east from here.

But I am strongly tempted to  
finish the season in S. Arizona and  
N. Sonora. This season is - and pro-  
mises to continue - a remarkably  
favorable one for this region; and  
the Indians so well behaved as  
to render, even the Southern Chiricua-  
hua Mts., (the continuation on our

side of the Sierra Madre Mts. of Mexico comparatively safe, it is thought. That is a vast district only just touched, I believe, by Lemmon.

Whenever I go here I see plants unknown to me, which are waiting for the summer rains; so I judge the later season will be as productive as the spring months have been. I began south to make a longer season, you know; then it was late spring in the north, and I lingered here, then lingered longer till Mr. Sargent's business was in order. Should I stay through the season, I think I might do so thorough work along the boundary, as to be anxious to go into a new field another year. Then the Lemmons are worth, I hear. Though I have power on the A. & P., I presume they would be renewed next year, if I desired. Please advise, Yours truly, C. G. Tringali.
