

The two last go into my acct.
Yours faithfully,
C. G. Pringle.

Charlotte, Vermont.

22, Dec., 1885.

Dear Mr. Gray,

These notes in reply
to yours of the 19th. —

678. Guardiola. River cañons of
rocky hills west of Chihuahua.
Perennial in large clumps.
309. Zaluzania. Ops, wholly her-
baceous. In loose clumps
from running rhizomes.
293. In my boxes which must be
near home now, since Prof.
Daird sent them on from
Washington a week ago. Will send
stock of it as soon as I can.

Riddley

296. Artemisia. odor somewhat like that of A. Absinthium, perhaps stronger; not particularly ingrata to me. If you want to call it A. Chilimanhuensis, it will be fittingly named, since I found it near the city of Chilimanhua on cool hillsides under cliffs. Probably common in such situations among the foothills west of Chi-

640. I thought this might be a species of Trachulosperma, and T. difformis, Gray, from the size of the flowers, remnants of which I found; but the habit of the plant made me uncertain. This is a shrub only 2 or 3' high erect in broad clumps. Under cliffs and ledges of hills near Chilimanhua.

62. Micostilma Pringlei, Gray n. sp.
Rocky hills around Chilimanhua.

Assumed to be the same as 70 + 366; and so only a few specimens were taken. Furnishes another reason for a short visit to Chilimanhua.

84, 590. Gonolobus acuminatus, Gray n. sp. Valley near Bachimba (a ranch once visited by Thurber,) 40 miles south of Chilimanhua. [Please read Mr. Horsford's Gum 56; for 84 is a Verbena.] Again (59) near Chi-, Tab.

104, 692. Gonolobus Chilimanhuensis, Gray n. sp. Well named; for I found it on the hills and mesas about Chi-

55, 696. Gonolobus stenopetalus, Gray n. sp. Shaded nooks among cliffs and ledges of rocky hills near Chilimanhua. Soft-woody toward the base, with herbaceous branches from our foot, then erect, to six feet and feebly twining. Such without coma, as you must have noticed.

146. Machaonia Pringlei, Gray n.sp.

Limestone ledges of mountains near
Jimulco, S.W. Coahuila, 3°-6° feet
high; 27th, April.

16, 356. Aristonia Pringlei, Gray n.sp.

Gravelly slopes, Santa Eulalia Mts.
(limestone) near Chihuahua. Fls. white
changing to purple.

96. Is not this Brickellia Pringlei,
instead of B. Coulteri, as written?

Extends the range to Chihuahua.

649. "Brickellia corymbosa, Gray". Is

K, ^{monophylla} there some mistake about the figures?
a corymbosa?

My specimen seems to be Kuhnia.

143. 270. Brickellia glutinosa, Gray n.sp.

Dry limestone cliffs, mountains
near, Jimulco, S.W. Coahuila,
27 April.

684. Aplopappus. I wanted to get A. gracilis, (I had taken A. spinulosus in Arizona,) and examined many plants everywhere met with, and without any relief to my perplexity. I finally selected plants either annual or flowering for the first time, rejecting such as appeared, (from thicker roots and stumps of branches of previous seasons) to be perennial. I failed to detect any differences in pappus or involucre. Shall I ticket this A. gracilis?

338. 4°-6° high, banks of streams. (Solidago)

553. "Solidago nemoralis, var.?" Yes, only spec. a waif from the western mountains.

303. Aphantostephus pinnatifidus, Gray n. sp.
Perennial. Cool slopes, mountains west of Chihuahua. 19, Oct.

305. Gnaphalium Tringlii, Gray n. sp.
Cool slopes under cliffs of hills near Chihuahua. 25, Oct.

309. Zaluzania discoides, Gray n.sp.
3"-4" tall. Bluffs of streams among
the hills west of Chihuahua.
646. Helianthella Pringlei, Gray n.sp.
Rocky hills west of Chihuahua. Sept. 7th.
657. Verbesina Chihuahuensis, Gray n.sp.
On limestone ledges and cañon walls
of the Santa Eulalia Mts. near Chihuahua.
293. Leptosyne Arizonicus, Gray.
Have I mixed species under this
number? My specimen is annual,
and belongs to another genus. My
recollection of my specimens is
that all were annual.
638. Iridax bicolor, Gray. Disk fl. yellow.
Rocky hills near Chihuahua.
571. Perityle microcephala, Gray n.sp.
A single plant found among the
rocky hills just east of Chihuahua.

13. *Perezia*. Yes. Specimens all from
an hillside of $\frac{1}{4}$ mile area, and
more or less in shade of shrubs.

583. *Perezia platyphylla*. I found only 5 plants.

Pringle, Cyrus G. 1885. "Pringle, Cyrus Guernsey Dec. 22, 1885 [Pringle to A. Gray]." *Cyrus Guernsey Pringle letters to Asa Gray*
