

Charlotte, Vermont.

7, Jan., 1886.

Dear Mr. Watson,

Thanks for your favor of the 5th, setting me right. I did not understand these things, as I should. *Acacia constricta* there is variable, as a comparison of these glutinous specimens with my Arizona specimen of 1881 and Dr. Palmer's no 313 from Parás shows. Perhaps the shrubs, which I saw about Chihuahua, are farther removed from the glutinous form than these. I must look at them again, if I return there, and perhaps show you specimens. The difference noticed by me was not caused by different conditions, surely.

Now, may I beg you to glance at

the specimen I sent from Arizona in 1858
as *Microthamnus*? Flowers so much smaller
than these. If that is not right, please
drop me a card, that I may correct it.

I don't believe we are continuing for new species.
I am perfectly satisfied to leave them
to the judgment of yourself and Dr. Gray.

Yours sincerely,

C. G. Pringle.

P.S.

Here I send tickets for the specimens
which (not going into my uniform sets,)
will have no printed tickets. Many you
will not care to preserve, but you can
choose.

Pringle, Cyrus G. 1886. "Pringle, Cyrus Guernsey Jan. 7, 1886 [Pringle to S. Watson]." *Cyrus Guernsey Pringle letters to Asa Gray*
