

MEMORANDUM.

PRINGLE & HORSFORD,
CHOICE NOVELTIES
FOR GARDEN AND FIELD.
NORTH AMERICAN
PLANTS and SEEDS.

To

TELEGRAPH ADDRESS,
HORSFORD, Charlotte, Vt. Charlotte, Vt., U. S. A. May 25 1886.

Dear Sir,

Yours of the 24th is at hand.
 The Cypripedium you mention is the
C. Montanum? from Washington. I.
 We grow them here easily by giving
 them a slight covering of leaves in winter
 to protect from frost.

Mr. Pringle is preparing to go back
 to Mex. as soon as he can.

While I take Wiloughby a few days
 ago, I found in a little pond a
Nuphar whose roots seem identical
 with those of *N. polysepala*, which
 we get from Wash. It was not
 in flower but in bud, and I sent
 Mr. Morong two or three plants. The
 roots of *polysepala* we get from Wash. are

quite unlike any I have ever
seen of ours ^{nuptials}, and having collected
them all in quantities to sell, I have
always noted how different those of
poly sepals are. But in the buds
of all the plants at Willoughby which I
examined, I found only 6 sepals.

The roots of these plants are not mentioned
in their description.

Yours truly
F. A. Harvord,

Have never know of
Cypripedium candidum
being found in N.

Horsford, Frederick Hinsdale. 1996. "Horsford, Frederick H. May 25, 1996 [to unknown]." *Cyrus Guernsey Pringle letters to Asa Gray*
