

51 Elm St. Woburn, Nov. 15, 1904.

Dr. G.G. Kennedy:-

Dear Dr. Kennedy:-

Your letter about sending Botrychium lunaria to Mr. Eggleston, came to hand this morning. I am perfectly willing that you should send it and do with it in every respect as if it were your own. I suppose Mr. E. wants to verify it for himself.

I wonder if you might not like to take a brief trip to Willoughby with me and any one else who might wish to go, — in the month of June and then we could explore Beaver Meadow and other spots on the Mt. Horr side to much advantage. I could not spend more than a day or two at that time of the year, or not more than two or three days any way. I would like to see that interesting sphagnum swamp when the Orchids and Heaths are all in bloom. There is a large amount of Ledum there too.

My note on the lunaria will come out in the November Rhodora:-

Yours with high regard,

*Geo. H. Tallon.*

Tilton, George Henry. 1904. "Tilton, George H. 15 Nov 1904." *George Golding Kennedy correspondence*
