

Waterbury Conn
Dec 3

Dear Mr Deane.

Yours of the 29th recd. As you remarked in your letter the Euphorbia was overripe for herbaria purposes that is if you expect the fruit to stay on. As I find that they have about all fallen off in drying and handling. As I use small packets attached to the sheet for holding seeds it does not matter. I shall try and get down there next season at an earlier date and take time to look the station carefully. I will send you a specimen also one for the Gray herbarium. Don't expect them very soon as I get very little time for such work. I have many plants I expect to send to the New Eng - Botanical Club Herbarium and hope to get them in shape some time this winter.

(over) Sincerely Arthur E. Blewett

After reading your article in "Rhodora" I have
examined every patch of the plants that I have
seen. I will continue to watch for fruit.

A.C.D.

Blewitt, Arthur E. 12-03. "Blewitt, Arthur Edmund Dec. 3 [no year]." *Walter Deane correspondence*
