

Emma, Mo. Sept. 3<sup>o</sup> 96.

My dear Mr. Deane:

Your kind letter of Aug 6-96 received. I hope you enjoyed your trip in the beautiful Region at the Foot of Mt. Wouadnock!

I know to appreciate such summer resorts faraway from the heat & dust of the Cities, high up in the mountain air. Since I have been out twice in the Rockies, I feel homesick for the Mountains every year as soon as the season begins.

But now ad rem. I have the pleasure to send you today with these lines the processed ripe fruits of our new Viburnum. The fruits are gathered by Rev. E. Heck, Cole Camp, Benton Co, Mo. Aug 30<sup>o</sup> 96.

Of the variatio nova of *Vib. pubescens* he could not find any fruit - because (as I believe) he could not find the shrub.

As to your request about my photos

I am sorry to say, that I cannot serve  
you at present but at the first chance  
you shall have one.

I am no reader of the Botanical Gazette.  
though I wish to see once the number  
in which you published the new species.  
Will you not be so kind to send me yours  
for a day or so - I shall return it promptly.

A few years ago I had a little patch of  
*Tillaea simplex* Nutt. in my garden. I got ~~fresh~~  
specimens from the Lookout Mt. Tenn.  
I am not sure, but I guess it was *Tillaea*  
*simplex*. It was a minute Portulacca-like  
plant with minute *Sedum pulchellum* Mx - like  
flowers. The entire mass of stems & leaves  
was a rubiforme mat with little diamond  
offlowers. I dried some. As soon as  
they came to my sight, I will send you  
a sample.

With my best regards

Sincerely Yours

C. H. Davenport
