

UNITED STATES DEPARTMENT OF AGRICULTURE,  
BUREAU OF PLANT INDUSTRY.

DRUG PLANT, POISONOUS PLANT, PHYSIOLOGICAL,  
AND FERMENTATION INVESTIGATIONS.

Washington, D. C., Nov. 25, 1913.

My dear Mr. Deane.

Dept. Agric. fits me all right for my address. I seem to be permanently tied down here now, so much so that I have bought me a place.

I am not at all surprised that you find more or less trouble with your *Crataegus roanensis*. You know, *roanensis* has its type locality on the tops of the North Carolina mts. Our New England material is none of it quite typical. And no doubt you can find plenty of material that would puzzle me to tell from *C. macrosperma*. Good *roanensis* has a different cut of leaf as well as smaller ~~XXX~~ fruit. Am always glad to look over anything for you.

Hope to run up to Cambridge some time this winter.

Remember me to all of the friends.

Yours,

W. W. Eggleston

Eggleston, W. W. 1913. "Eggleston, Willard Webster Nov. 25, 1913." *Walter Deane correspondence*
