

Syracuse June 24<sup>th</sup> 1877

Dear Sir

I have finally found time to put you up a few more ferns. and hope you have not lost all patience, waiting for them. I was sick a long time this Spring, and felt miserable to look a ferns. I have a nice lot in press now but do not know as you will care for any of them. Will send you a list of what I have in the Hall. I shall go up into the North Woods, in about 3 weeks to spend the Summer, will get you more *Terrestrial*, and *Opheoglossum* etc.

Please tell me what you think of the ~~as~~ old specimens of

Spiculosum? I found a great  
many of them! Also please tell  
me what the two Spiculosums  
that are alone are? are they  
Boottii? Are not the little  
Botrychiums are cunning?  
Please tell me what the fern  
is that looks like marginale?  
the fructification is not on  
the margin. I have two  
roots, if you care for one  
I could send it to you.

Yours very sincerely  
Hate H. Barnes

P.S. I am afraid I gave  
the best Phlegopteris Calcareum  
to Mrs. Rust.

Barnes, Kate S. 1877. "Barnes, Kate S. Jun. 21, 1877." *George Edward Davenport correspondence*
