

H Thanks for your Catalogue  
like it very much, for  
it is full of information.  
think you are getting ahead  
of Prof Eaton as a careful  
observer and <sup>happy</sup> faculty of giving  
a complete description of your  
studies. I am going to work  
on my new Check list.  
and it will show many  
new species obtained through  
your untiring efforts. I have  
during the winter spent much  
time with my new microscope  
particularly on the simplest  
forms of vegetable life. very  
the Infusoria. If you have  
no one in your Botanical Club  
that has given their attention to  
this branch I would come in  
July after the Boston Schools are  
closed and give them an Exhibition  
of these singular forms of life.  
I shall be very busy till July. I shall  
have a class in Lapidary at the  
College Normal School at Framingham  
and the High School in Waltham. besides  
collecting flowers for the Boston Schools  
Yours W Edwards
