

Atco, N.J. June 8th, 1881.
 Mr. Geo. E. Barrett.
 My dear Sir -

Yours & the
 P.S. came yesterday. Am very
 much pleased with it & feel
 that you have done us quite a
 favor in sending it.

There is one other point about
 which I would like a little
 information - that is what do
 you do with large forms, such as
 are too large to go on your sheets?
 Those that are too long may be doubled
 but if from 2 to 5 feet long what do
 you do? if too broad how? If you
 can give information on these points
 it will help.

Perhaps the following will
 help your eyes, it is safe & frequent.

ly very helpful. Each ~~nitrate~~
of Potash & Sulphate of Zinc, pure,
enough to make a common sized pea,
to 2 oz. rain water & add a drop or two
of strained honey. Bathe the eyes in
this. If too strong too painful reduce
a part of it, & soon the eyes will
bear it full strength. I believe it
is of no value for inflammation.

Yours truly -

H. A. Green.

Green, Henry A. 1881. "Green, Henry A. Jun. 8, 1881." *George Edward Davenport correspondence*
