

pleased with - the University - We are long

he could not remain.

I trust - I shall see you some time this summer -
perhaps - I will let you know before September about
I am coming - I would have done so last week, I
feared I might inconvenience you in leaving a day.

Tom Laid - I came up through Cranford North
stopping at Intervale over night, and a good deal
while at Fabyans. There was a crust & I went at
the fine house - the Mountains were magnificent and
most - comely, and the Lake was most beautiful.

Very truly yours

Elizabeth B. Davenport.

AUDUBON SOCIETY OF VERMONT.
FOR THE PROTECTION OF BIRDS.
ELIZABETH B. DAVENPORT,
CORRESPONDING
SECRETARY.
+ BRATTLEBORO, VT.

X
Rutland Jan. 20 -

My dear Mr. Davenport.

I am returning both
your pamphlet and the
blue print of B. Linnæus thanking
you for both. Just will
see from enclosed program
what a fine meeting we have
had. I came on Monday & will
not leave here until Tuesday
next as there are many friends
to see, and I want to go over to
the laboratory again. They are very
kind at the University - Prof. Ward
makes me very welcome in the
laboratory - I say he has been
showing me the breeding species
of the potato rat, and the method

Pringle already has most of his cows full, but there is ample room for additional stock & the University will do all that is needed. Mr. Pringle is not very well. He sends his love to you. He said "Send my love to my dear friend Dr. Davenport." He has a pound ofitted up on the floor of ^{with the Herbarium} and has there continually taken home. He is very lonely since his Mother died. Through his nephews he has lost his homestead and all the little money he had saved. His home is the home of Strangers.

I am so very sorry for him.

Mr. Fernald of Bureau of Forestry was in Burlington the week previous to the meeting. He was greatly

interested in milk, and the bacteria of anethox. just now one student was working on germination of pollen. The general force was busy testing commercial seeds, and I saw all the seeds which we found with our grains & grasses, & much enjoyed seeing the seed of so many of our plants which we seldom handle.

In my visit with Mr. Pringle to his Herbarium he showed me the *Syracuse* specimens of *B. Onondagense*. Also *B. Can.* - known long ago collected in Vermont as *matricaria*, but most of our time was given to talking of Mexico. Mr.

Davenport, Elizabeth Braxton. 01-20. "Davenport, Elizabeth B. Jan. 20 [no year]." *George Edward Davenport correspondence*
