Mr Walter Deane

Dear Sir

Your letter of Mar 1<sup>st</sup>  
received. I am sorry that  
I have no duplicates of  
*Panicum calliphyllum* left.  
I collected this species last  
summer for the first time  
but did not know its importance  
until sending specimens to  
Agnes Chase. After sending a  
specimen to Ottawa and retaining  
a single sheet for myself I  
sent what remaining material  
I had left to Washington.  
As I expect to collect 30 sheets

[Mar 9 1911]

for Washington next summer  
I shall keep you in mind.

You ask about the fruiting  
of *Euphorbia cyparissias* and  
I can answer with some  
certainty. Last summer I  
was collecting seed specimens  
for the Dept of Agriculture Ottawa  
1 pint of many species and  
amongst their list was  
*Euphorbia cyparissias*. I found  
that although fruiting sparingly  
it did not produce seed in  
sufficient quantities to allow  
of collecting the desired amount  
so I passed it over. I however  
examined the seed merely to  
see how it would measure up.  
I have not seen a copy  
of *Rhodora* for some years  
the Ottawa Naturalist being

the only publication along  
these lines that comes to me  
but would be much pleased  
to have a copy

Sincerely yours

W. Verriot
