

Abingdon, Ill.
Apr. 17, 1880

Dear Sir.

I rec'd your catalogue
and was very much pleased with
the arrangement and have found
the notes very useful.

I also received your letter con-
taining a description of *B. borealis*.
for which I am very grateful.

If you will not consider it
a burden I would like to
trouble you once more.

In what way does *B. truncatum*
var. *lunarioides*, Mild^{er} differ
from the type? I had supposed
that *B. lunarioides*, such as
recorded in Gray's Manual

was the equivalent of *B. tern.*
var *lunarioides* but find
that Eaton makes *B. ternatum*
Swz and *B. lunarioides* Swz.
synonymous. Can you help
me in this?

I would also like to know
the character of the spores
of *B. lunaria*, *B. boreale*,
and *B. lanceolatum*.

Yours very truly
Lucien M. Underwood.
