

W. G. WRIGHT, Amateur Botanist, and Collector of

PALMS, YUCCAS, CACTI, LILIES, FERNS, RARE DESERT PLANTS, MEDICINAL HERBS,

AND SEEDS OF TREES, SHRUBS, AND FLOWERS.

K

San Bernardino, Cal., Dec 26 1880.

Dear Sir

I have received your card in which you say that I have, in sending box of new *Pellaea* roots, "anticipated my request made a day or two ago by letter" &c

No letter of request, or in fact no letter at all has been had from you very lately.

If you have sent any letter containing requests, it has been lost, or miscarried.

I feel greatly interested in that *Pellaea*. I have pressed some fronds from my plants at home, which I will send. They will give a good idea of the greenhouse style of growth.

I have also bethought me

of one or two bunches of
the fern in the mountains
that are growing low down -
- say 2500 ft altitude, & are not
now covered by snow, & can be
had at any time, as the
distance is only one day &
a half. If you want them
please direct how much I
am to send, &c. But the
large, fine plants are high
up, say 8000 ft, & are now covered
by snow & cannot be obtained.

Dr Parry has just arrived,
& will make headquarters here for
the winter. He has obtained
his pass from Gov. Stanford.
He will try to get an "assistant"
passed along with himself.

Yours truly
W. G. Wright
