

Providence, Feb 3d, 1890.

There was a fine fellow named Deane,
A botanical sharper, I ween,
He struck terra firma -
And cried "flaccosperma,
Thy tables complete now, I ween!"

Here it is; in Olney Herb. { No. I,
Plantæ Texanæ. { in Olney
sheets.

No 744.

Carex flaccosperma, Dewey
Wet woods, Houston, April 12.
Eastern Texas, Coll Elihu Hall, 1872.

—
(No 2. in Olney). Same
from Louisiana.

Hale, legit.

Comm by J. C. Porter.

Both ~~are~~ these are inclosed with one, apparently the same, marked "Carex grisea, Wahl. B multica
C. flaccosperma, Dewey.

Hale, legit. Red River, Louisiana.

d. On the fruit sheet are these notes -
1 set. ♂ spikes sessile ♂ spikes pedunculate.
♂ spikes sub-sessile. Some viriparous fruits.

I certify upon oath that this all I know of C. floccosperma. I had a delightful letter yesterday from Dr H. Christ of Basel, in English, and singularly good English, till he comes to the P.S., where he writes remrks that he has "an engaged admnistrtror of all ferns and fern allies", and expresses his "illimitable sympathies" with Miss Bailey in her school.

My dear little ones are quite well again, and we
are re-united, and with grateful hearts. As usual, when
I write to you, I am in the clutches of a theoristie
(new version) neurogia, much increased by having a
box-ball pass through a window near my head, in the
hot sun afternoon, scattering fine glass all around me,
I thought at first it was an explosion. Finally - I went out
in a towering passion (Lord, how mad I was!) and
metaphorically called that young man, Even the worm will
turn. Ruth crushed to earth will rise again, and you know
them. John Friend - is a little pepper pot when he's riled. But
then Nature levies toll on me for all excitement,

I have the "Botanists" on exhibition at College,
Have made a big key to the thing. It is a great picture.
Yours ever.

July you ever.

Bailey (W.W.).

Bailey, William Whitman. 1890. "Bailey, William Whitman Feb. 3, 1890." *Walter Deane correspondence*
